

**HBVsAg adw2**

Recombinant Hepatitis B Surface Antigen adw subtype 2
recombinant, *E. coli*

Cat. No.	Amount
PR-1196	50 µg

For general laboratory use.

Please centrifuge briefly before opening (volume ≤2 ml).

Shipping: shipped on gel packs

Storage Conditions: store at -20 °C

Additional Storage Conditions: avoid freeze/thaw cycles

Shelf Life: 12 months

Molecular Weight: 23 kDa

Purity: > 90 % (SDS-PAGE)

Form: liquid (supplied in PBS and 25 mM K₂CO₃)

Applications:

Antigen in ELISA and Western blots, excellent antigen for detection of HBV with minimal specificity problems.

Description:

HbsAg subtype adw2 produced in *E. coli*, is a single, non-glycosylated, polypeptide chain containing 226 amino acids and having a molecular weight of approximately 23.0kDa. HBsAg adw2 migrates on SDS-PAGE as a 23kDa monomer band with minor amounts of dimer (46kDa) and trimer (69kDa) forms.

The HBsAg is fused to a 6 His tag on C-terminus and purified by proprietary chromatographic techniques.

Specificity: Immunoreactive with sera of HBV-infected individuals.
