

# iFluor™ 790 Anti-human CD43 Antibody \*HI165\*

Catalog number: 104300M0, 104300M1

Unit size: 100 tests, 500 tests

#### **Product Details**

Storage Conditions 2-8°C with minimized light exposure. Do not freeze.

Expiration Date 12 months upon receiving

Concentration 0.1 mg/mL

Formulation Phosphate-buffered saline (PBS, pH 7.2), 0.09% sodium azide, 0.2% (w/v) BSA

### **Antibody Properties**

Species Reactivity Human

Class Primary

Clonality Monoclonal

Host Mouse

Isotype Mouse IgG1

Immunogen CD43 (Leukocyte Sialoglycoprotein, Leukosialin, Galactoglycoprotein, SPN)

Clone HI165

Conjugate iFluor™ 790

### **Biological Properties**

Appearance Green liquid

Preparation Antibody purified by affinity chromatography and then conjugated with iFluor™ 790 under

optimal conditions

Application Flow Cytometry (FACS), Fluorescence Imaging

#### **Spectral Properties**

Conjugate iFluor™ 790

Excitation Wavelength 787 nm

Emission Wavelength 812 nm

## **Applications**

The HI165 monoclonal antibody reacts with human CD43, a 95 - 135 kD transmembrane protein commonly located on the surface of plasma cells, thymocytes, neutrophils, myelomas and T cells. In some organisms, CD43 plays a role in the downregulation of cell adhesion, promotes tumor necrosis factor biosynthetic process and acts to negatively regulate T cell proliferation. From a research standpoint, it is of biological

interest due to its association with vital macromolecules/ligands such as EZR. CD43 is a fairly uncommon antibody target, with a little more tha 5000 publications in the last decade. Even still, CD43 has been widely used in immunology research, frequently serving as a phenotypic marker for differentiating cell types in flow cytometric applications. This antibody was purified through affinity chromatography and conjugated to iFluor™ 790 (ex/em = 787/812 nm).
