

# iFluor™ 514 Anti-human CD328 Antibody \*6-434\*

Catalog number: 13280060, 13280061

Unit size: 100 tests, 500 tests

#### **Product Details**

Storage Conditions 2-8°C with minimized light exposure. Do not freeze.

Expiration Date 12 months upon receiving

Concentration 0.1 mg/mL

Formulation Phosphate-buffered saline (PBS, pH 7.2), 0.09% sodium azide, 0.2% (w/v) BSA

### **Antibody Properties**

Species Reactivity Human

Class Primary

Clonality Monoclonal

Host Mouse

Isotype Mouse IgG1

Immunogen CD328 (Siglec7, AIRM1)

Clone 6-434

Conjugate iFluor™ 514

### **Biological Properties**

Appearance Orange-red liquid

Preparation Antibody purified by affinity chromatography and then conjugated with iFluor™ 514 under

optimal conditions

Application Flow Cytometry (FACS), Fluorescence Imaging

#### **Spectral Properties**

Conjugate iFluor™ 514

Excitation Wavelength 528 nm

Emission Wavelength 555 nm

## **Applications**

6-434 is an anti-human monoclonal antibody that forms an immune complex with the CD328 antigen. CD328 (alternatively called Siglec7 or AIRM1) is a 75 kD transmembrane protein that is found on the surface of cells like macrophages and T cells. CD328 is associated with a variety of biologically interesting macromolecules/ligands, in particular, silylated glycans. CD328 is a relatively rare antibody target, with fewer than 20

publications in the last decade. Even still, CD328 has a variety of applicati differentiating cell types in flow cytometric applications. This antibody was $514$ (ex/em = $528/555$ nm). It is compatible with the $532$ nm laser and $57$ A5).	as purified through affinity chromatography and conjugated to iFluor™
