

Product no **AS04 055****Anti-GPX | Glutathione peroxidase (chloroplastic)****Product information**

Immunogen	thioredoxin fusion of 58 amino acid region between Ser at position 175 and the C-terminal Ala of <i>Arabidopsis thaliana</i> GPX7 accession At4g31870 has been used for antibody production
Host	Rabbit
Clonality	Polyclonal
Purity	Serum
Format	Lyophilized
Quantity	100 µl
Reconstitution	For reconstitution add 100 µl of sterile water
Storage	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.

Application information

Recommended dilution	1 : 1, 1 : 2, 1 : 4, 1 : 8, 1 : 16 (ELISA), 1 : 5000 (WB)
Expected apparent MW	25 20 kDa
Confirmed reactivity	<i>Arabidopsis thaliana</i>
Not reactive in	No confirmed exceptions from predicted reactivity are currently known
Additional information	This antibody is recognizing <i>Arabidopsis thaliana</i> GPX (two chloroplastic isoforms). Antibody has also a weak cross-reactivity to cytosolic forms, therefore work on isolated chloroplasts is recommended.
