

Product no **AS15 3033**

Anti-RFP | Red Fluorescent Protein (mouse monoclonal)

Product information

Immunogen	dsRed, recombinant Red Fluorescent Protein expressed in bacteria
Host	Mouse
Clonality	Monoclonal (clone RF5R)
Purity	Total IgG. Protein A purified in PBS, pH 7.4. Contains 0.055% sodium azid.
Format	Liquid
Quantity	100 µg
Storage	Antibody can be stored at -20°C for up to 1 year. Make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.

Additional information | exact working dilution needs to be determined by end user

Application information

Recommended dilution	1:1000 (WB), 1:200 (IHC), 5µg/mg lysate (IP)
Confirmed reactivity	Red fluorescent protein (RFP)
Not reactive in	No confirmed exceptions from predicted reactivity are currently known
Additional information	Antibody is protein A purified
Selected references	to be added when available antibody available in October 2015
