

Product Information

(1→3)-β-D-Glucan Inhibiting Buffer

CAT#: ER-008

(1→3)-β-D-Glucan Inhibiting Buffer is used to reconstitute LAL and render the reagent insensitive to (1→3)-β-D-glucan interference by effectively blocking the Factor G pathway of the endotoxin clotting cascade. For use with multi-test vials, Turbidimetric Formulation lysate and Chromo-LAL lysate.

CAT#	PRODUCT	Package	Storage
ER-008	(1→3)-β-D-Glucan Inhibiting Buffer	5.5 mL/vial 5 Pack	
ER-008	(1→3)-β-D-Glucan Inhibiting Buffer	25 Pack
