

PreDicator RoboColumn Capto L

Product Information

Cat#No# RC-040P

Product Overview

These PreDicator RoboColumn minicolumns are prepacked with Capto L, an affinity chromatography resin for capture of antibodies and antibody fragments such as Fab fragments, scFv, and Dabs.

Description

PreDicator RoboColumn units are prepacked, miniaturized columns that support HTPD using a robotic liquid handling workstation, such as Freedom EVO from Tecan, for fully automated and parallel chromatographic separations. Perform HTPD work using PreDicator RoboColumn units, alone or as a complement to PreDicator 96-well filter plates.

Characteristic

Supports high-throughput process development (HTPD) by allowing parallel screening of chromatographic conditions using a miniaturized column format and robotic workstation.

Facilitates screening of a wide range of parameters with small sample consumption.

Prepacked with 200 or 600 μ L of chromatography resin.

Automation and parallel screening reduces experimental time and minimizes hands-on time.

High-throughput workflow allows investigation of enlarged experimental workspace for better process understanding.

Maximum operating pressure

Up to 8.0 bar

Recommended flow rate

16 to 1000 cm/h

Recommended column height

39 mm

Chemical stability

Commonly used aqueous buffers, pH 1 to 14, organic solvents.

PreDictor RoboColumn Capto L

Temperature stability

4°C to 30°C

Storage

2°C to 8°C

Pack size

600 µL
