

## Product Information

### LPS

CAT#: E114

#### Product Information

<b>Description/Features</b>	Lipopolysaccharide (LPS) from E. coli strain EH100 (Ra), R-type (rough/mutant) LPS
<b>Origin</b>	E. coli strain EH100
<b>Forms</b>	Liquid. Colourless clear aqueous solution.
<b>Purity</b>	≥99.9%. No detectable DNA, RNA and protein traces.
<b>Concentration</b>	1mg/ml stabilised in sterile, double-distilled water (ddWater), without any additives.
<b>Biological Activity</b>	Optimal concentration is dependent upon cell type, species, desired activation and analysis: 0.05-1.0µg/ml. Does not activate any TLR other than TLR4 as tested up to 50µg/ml in relevant cellular systems (macrophages).
<b>Usage</b>	Do not freeze. To yield a 100µg/ml (1,000-100x) stock solution add 100µl of LPS to 900µl endotoxin-free and sterile ddWater or 0.9% NaCl Solution and mix well. Prepare diluted LPS working solutions just prior to use, keep sterile. Ready-made solution is cell culture-grade.
<b>Storage</b>	Stable for at least 2 years after receipt when stored at +4°C.
