

# **PreDictor RoboColumn Capto adhere**

## **Product Information**

Cat#No# Pr-299P

#### **Product Overview**

These PreDictor RoboColumn minicolumns are prepacked with Capto adhere, a mixed mode (multimodal) chromatography resin for intermediate purification and polishing of monoclonal antibodies.

#### **Description**

PreDictor RoboColumn units are prepacked, miniaturized columns that support HTPD using a robotic liquid handling workstation. Perform HTPD work using PreDictor RoboColumn units, alone or as a complement to PreDictor 96-well filter plates.

#### Characteristic

Supports high-throughput process development (HTPD) by allowing parallel screening of chromatographic conditions using a miniaturized column format and robotic workstation.

Facilitates screening of a wide range of parameters with small sample consumption.

Prepacked with 200 or 600 µL of chromatography resin.

Automation and parallel screening reduce experimental time and minimize hands-on time.

High-throughput workflow allows investigation of enlarged experimental workspace for better process understanding.

#### **Maximum operating pressure**

Up to 8.0 bar

#### Recommended flow rate

16 to 1000 cm/h

### **Storage**

4°C to 30°C

#### **Dimensions**

10.0 mm

#### Column volume
