

Product Information

LAL Reconstitution Buffer

CAT#: ER-009

LAL Reconstitution Buffer is an FDA licensed buffer for reconstituting Turbidimetric Formulation lysate. It is used for testing electrolytes, strongly buffered solutions (especially bicarbonate buffers), and solutions for which it is difficult to adjust pH into the required range. LAL Reconstitution Buffer is also available with a pH indicator for gel-clot applications.

CAT#	PRODUCT	Package	Storage
ER-009	LAL Reconstitution Buffer	5.5 mL/vial 5 Pack	
ER-009	LAL Reconstitution Buffer	25 Pack
