

Hydrolyzed whey protein

Product Information

Cat

COS-3492

Product Name

Hydrolyzed whey protein

Content

0.9

Appearance

White Powder

Storage

Store in refrigerator.

size

1 kg

Solubility

Water-soluble.

Description

Hydrolyzed whey protein is a derivative of whey protein that has been broken down into smaller peptides and amino acids through a process called hydrolysis. This process makes the protein more easily absorbed by the skin and enhances its bioavailability. In cosmetics, hydrolyzed whey protein is valued for its moisturizing and conditioning properties. It helps to improve skin hydration, enhance skin barrier function, and promote overall skin health. Moreover, it may aid in soothing irritated skin, reducing the appearance of fine lines and wrinkles, and providing a smoother and more youthful complexion. The inclusion of hydrolyzed whey protein in cosmetic formulations offers a range of benefits, making it a popular ingredient in skincare products.

Hydrolyzed whey protein

Benefits

Rich in amino acids, it can help lock in skin moisture and improve skin hydration;
Ingredients with antioxidant properties can neutralize free radicals and reduce oxidative damage to the skin;
Stimulates the production of collagen, helps maintain skin elasticity and reduces the formation of wrinkles;
Promotes the regeneration and repair of skin cells, helps accelerate wound healing and improve skin condition;

Use

Can be added to formulas as is; add to water-phase of formula. For external use only.

Applications

All kinds of skin care products, including creams, lotions, eye creams, masks, body creams and hair care products, including shampoos and conditioners.

Raw material source

Milk

Manufacture

Hydrolyzed whey protein is a product containing protein, oligopeptides and free amino acids made from whey through ultrafiltration concentration, laminar flow separation, enzymatic hydrolysis, drying and other processes.

Animal Testing

Not animal tested

GMO

GMO free. Gluten-free.

Vegan

Does not contain animal derived components
