

PD MiniTrap G-25 columns

Product Information

Cat#No#	PD-126P
----------------	---------

Product Overview

PD MiniTrap G-25 columns are prepacked, single-use gravity columns for desalting, buffer exchange, and sample cleanup.

Characteristic

Flexible protocols with the ability to use gravity flow or centrifugation.

Convenient desalting and buffer exchange of sample volumes of 0.1 mL to 0.5 mL for gravity and 0.2 mL to 0.5 mL with centrifugation. Replaces dialysis for desalting protein, which saves time and reduces labor.

Filled with Sephadex G-25 Superfine resin.

Recommended column height

28 mm

Storage

4 to 30°C, 0.15% Kathon CG/ICP Biocide

Pack size

50 columns

Dimensions

9.7 × 28 mm

Column i.d.

9.7 mm
