## Description

C-erbB-2/HER-2 is a member of the EGFR family. This mAb is specific and shows minimal cross-reaction with other members of the EGFR-family. Receptors of this family are located on the plasma membrane and consist of an extracellular ligand-binding domain that is connected to a large intracellular domain by a single transmembrane sequence. c-erbB-2/HER-2 protein is over-expressed in a variety of carcinomas especially those of breast and ovary.

## Application Notes

Optimal dilution of the recombinant HER2 antibody should be determined by the researcher.

## Immunogen

A recombinant partial protein sequence (within amino acids 1055-1255) from the human protein was used as the immunogen for the recombinant HER2 antibody.

## Storage

Aliquot the recombinant HER2 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
