

ATF-2 rabbit pAb

Cat No.:ES1722

For research use only

Overview

Product Name	ATF-2 rabbit pAb
Host species	Rabbit
Applications	WB;IHC;IF;IP;ELISA
Species Cross-Reactivity	Human;Mouse;Rat
Recommended dilutions	Western Blot: 1/500 - 1/2000.
	Immunohistochemistry: 1/100 - 1/300.
	Immunoprecipitation: 2-5 ug/mg lysate. ELISA:
	1/20000. Not yet tested in other applications.
Immunogen	The antiserum was produced against synthesized
C	peptide derived from human ATF2. AA range:35-84
Specificity	ATF-2 Polyclonal Antibody detects endogenous
. ,	levels of ATF-2 protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and
	0.02% sodium azide.
Storage	Store at -20°C. Avoid repeated freeze-thaw cycles.
Protein Name	Cyclic AMP-dependent transcription factor ATF-2
Gene Name	ATF2
Cellular localization	Nucleus. Cytoplasm. Mitochondrion outer
	membrane. Shuttles between the cytoplasm and the
	nucleus and heterodimerization with JUN is
	essential for the nuclear localization. Localization to
	the cytoplasm is observed under conditions of
	cellular stress and i
Purification	The antibody was affinity-purified from rabbit
	antiserum by affinity-chromatography using
	epitope-specific immunogen.
Clonality	Polyclonal
Concentration	1 mg/ml
Observed band	52kD
Human Gene ID	1386
Human Swiss-Prot Number	P15336
Alternative Names	ATF2; CREB2; CREBP1; Cyclic AMP-dependent
	transcription factor ATF-2; cAMP-dependent

Background

transcription factor ATF-2; Activating transcription factor 2; Cyclic AMP-responsive element-binding protein 2; CREB-2; cAMP-responsive element-binding pro

activating transcription factor 2(ATF2) Homo sapiens This gene encodes a transcription factor that is a member of the leucine zipper family of DNA binding proteins. The encoded protein has been identified as a moonlighting protein based on its ability to perform mechanistically distinct functions This protein binds to the cAMP-responsive element (CRE), an octameric palindrome. It forms a homodimer or a heterodimer with c-Jun and stimulates CRE-dependent transcription. This protein is also a histone acetyltransferase (HAT) that specifically acetylates histones H2B and H4 in vitro; thus it may represent a class of sequence-specific factors that activate transcription by direct effects on chromatin components. The encoded protein may also be involved in cell's DNA damage response independent of its role in transcriptional regulation. Several alternatively spliced transcript variants have been found for this gene [provided by RefSeq, Jan 2014

Western Blot analysis of various cells using ATF-2 Polyclonal Antibody
