

## **CRF-RII** rabbit pAb

## Cat No.:ES4817

For research use only

## Overview

| Product Name                 | CRF-RII rabbit pAb                                  |  |
|------------------------------|---|--|
| Host species                 | Rabbit  |  |
| Applications                 | WB;IHC;IF;ELISA                                     |  |
| Species Cross-Reactivity     | Human;Mouse;Rat                                     |  |
| <b>Recommended dilutions</b> | Western Blot: 1/500 - 1/2000.                       |  |
|                              | Immunohistochemistry: 1/100 - 1/300.                |  |
|                              | Immunofluorescence: 1/200 - 1/1000. ELISA:          |  |
|                              | 1/10000. Not yet tested in other applications.      |  |
| Immunogen                    | The antiserum was produced against synthesized      |  |
|                              | peptide derived from human CRHR2. AA                |  |
|                              | range:71-120  |  |
| Specificity                  | CRF-RII Polyclonal Antibody detects endogenous      |  |
|                              | levels of CRF-RII protein.                          |  |
| Formulation                  | Liquid in PBS containing 50% glycerol, 0.5% BSA and |  |
|                              | 0.02% sodium azide.                                 |  |
| Storage                      | Store at -20°C. Avoid repeated freeze-thaw cycles.  |  |
| Protein Name                 | Corticotropin-releasing factor receptor 2           |  |
| Gene Name                    | CRHR2   |  |
| Cellular localization        | Cell membrane ; Multi-pass membrane protein .       |  |
| Purification                 | The antibody was affinity-purified from rabbit      |  |
|                              | antiserum by affinity-chromatography using          |  |
|                              | epitope-specific immunogen.                         |  |
| Clonality                    | Polyclonal  |  |
| Concentration                | 1 mg/ml   |  |
| Observed band                | 48kD  |  |
| Human Gene ID                | 1395  |  |
| Human Swiss-Prot Number      | Q13324  |  |
| Alternative Names            | CRHR2; CRF2R; CRH2R; Corticotropin-releasing        |  |
|                              | factor receptor 2; CRF-R-2; CRF-R2; CRFR-2;         |  |
|                              | Corticotropin-releasing hormone receptor 2;         |  |
|                              | CRH-R-2; CRH-R2                                     |  |
| Background                   | The protein encoded by this gene belongs to the     |  |
|                              | G-protein coupled receptor 2 family, and the        |  |
|                              |   |  |

subfamily of corticotropin releasing hormone receptor. This receptor shows high affinity for corticotropin releasing hormone (CRH), and also binds CRH-related peptides such as urocortin. CRH is synthesized in the hypothalamus, and plays an important role in coordinating the endocrine, autonomic, and behavioral responses to stress and immune challenge. Studies in mice suggest that this receptor maybe involved in mediating cardiovascular homeostasis. Alternatively spliced transcript variants encoding different isoforms have been described for this gene.[provided by RefSeq, Jan 2011],

Immunohistochemical analysis of paraffin-embedded Human brain. Antibody was diluted at 1:100(4° overnight). High-pressure and temperature Tris-EDTA,pH8.0 was used for antigen retrieval. Negetive contrl (right) obtaned from antibody was pre-absorbed by

Immunofluorescence analysis of MCF7 cells, using CRHR2 Antibody. The picture on the right is blocked with the synthesized peptide.
