

Connexin 43 (phospho Ser261) rabbit pAb

Cat No.:ES5522

For research use only

Overview

Product Name Connexin 43 (phospho Ser261) rabbit pAb

Host species Rabbit
Applications IHC;IF;ELISA

Species Cross-Reactivity Human; Rat; Mouse;

Recommended dilutions Immunohistochemistry: 1/100 - 1/300. ELISA:

1/5000. Not yet tested in other applications.

Immunogen The antiserum was produced against synthesized

peptide derived from human Connexin 43 around

the phosphorylation site of Ser261. AA

range:226-275

Specificity Phospho-Connexin 43 (S261) Polyclonal Antibody

detects endogenous levels of Connexin 43 protein

only when phosphorylated at S261.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and

0.02% sodium azide.

Storage Store at -20°C. Avoid repeated freeze-thaw cycles.

Protein Name Gap junction alpha-1 protein

Gene Name GJA1

Cellular localization Cell membrane; Multi-pass membrane protein. Cell

junction, gap junction. Endoplasmic reticulum.

Localizes at the intercalated disk (ICD) in

cardiomyocytes and the proper localization at ICD is

dependent on TMEM65. .

Purification The antibody was affinity-purified from rabbit

antiserum by affinity-chromatography using

epitope-specific immunogen.

Clonality Polyclonal Concentration 1 mg/ml

Observed band

Human Gene ID 2697 Human Swiss-Prot Number P17302

Alternative Names GJA1; GJAL; Gap junction alpha-1 protein;

Connexin-43; Cx43; Gap junction 43 kDa heart

Background

protein

This gene is a member of the connexin gene family. The encoded protein is a component of gap junctions, which are composed of arrays of intercellular channels that provide a route for the diffusion of low molecular weight materials from cell to cell. The encoded protein is the major protein of gap junctions in the heart that are thought to have a crucial role in the synchronized contraction of the heart and in embryonic development. A related intronless pseudogene has been mapped to chromosome 5. Mutations in this gene have been associated with oculodentodigital dysplasia, autosomal recessive craniometaphyseal dysplasia and heart malformations. [provided by RefSeq, May 2014],

Enzyme-Linked Immunosorbent Assay (Phospho-ELISA) for Immunogen Phosphopeptide (Phospho-left) and Non-Phosphopeptide (Phospho-right), using Connexin 43 (Phospho-Ser261) Antibody

Immunohistochemistry analysis of paraffin-embedded human brain, using Connexin 43 (Phospho-Ser261) Antibody. The picture on the right is blocked with the phospho peptide.
