

Olfactory receptor 10C1 rabbit pAb

Cat No.: ES6278

For research use only

Overview

Product Name Olfactory receptor 10C1 rabbit pAb

Host species Rabbit WB;ELISA **Applications**

Species Cross-Reactivity Human; Rat; Mouse;

Recommended dilutions Western Blot: 1/500 - 1/2000. ELISA: 1/40000. Not

yet tested in other applications.

The antiserum was produced against synthesized **Immunogen**

peptide derived from human OR10C1. AA

range:61-110

Specificity Olfactory receptor 10C1 Polyclonal Antibody detects

endogenous levels of Olfactory receptor 10C1

protein.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and

0.02% sodium azide.

Store at -20°C. Avoid repeated freeze-thaw cycles. Storage

Protein Name Olfactory receptor 10C1

Gene Name OR10C1

Cellular localization Cell membrane; Multi-pass membrane protein. Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using

epitope-specific immunogen.

Clonality Polyclonal Concentration 1 mg/ml **Observed band** 34kD **Human Gene ID** 442194

Human Swiss-Prot Number

Alternative Names

Q96KK4/Q5SUN7

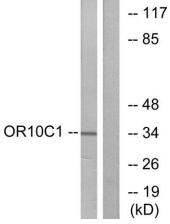

Background Olfactory receptors interact with odorant molecules

> in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share

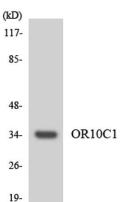

a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms. This olfactory receptor gene is a segregating pseudogene, where some individuals have an allele that encodes a functional olfactory receptor, while other individuals have an allele encoding a

Western blot analysis of lysates from LOVO cells, using OR10C1 Antibody. The lane on the right is blocked with the synthesized peptide.

Western blot analysis of the lysates from HeLa cells using OR10C1 antibody.
