## Overview

**Immunogen** 

**Specificity** 

Product Name p53 (Acetyl K319) rabbit pAb

Host species Rabbit

Applications WB;IHC;IF;ELISA Species Cross-Reactivity Human;Mouse;Rat

**Recommended dilutions** Western Blot: 1/500 - 1/2000.

Immunohistochemistry: 1/100 - 1/300.

Immunofluorescence: 1/200 - 1/1000. ELISA: 1/10000. Not yet tested in other applications. The antiserum was produced against synthesized

peptide derived from human p53 around the acetylated site of Lys317. AA range:283-332 Acetyl-p53 (K317) Polyclonal Antibody detects endogenous levels of p53 protein only when

acetylated at K317.

**Formulation** Liquid in PBS containing 50% glycerol, 0.5% BSA and

0.02% sodium azide.

**Storage** Store at  $-20^{\circ}$ C. Avoid repeated freeze-thaw cycles.

**Background** tumor protein p53(TP53) Homo sapiens This gene encodes a tumor suppressor protein containing

transcriptional activation, DNA binding, and oligomerization domains. The encoded protein responds to diverse cellular stresses to regulate expression of target genes, thereby inducing cell cycle arrest, apoptosis, senescence, DNA repair, or

changes in metabolism. Mutations in this gene are associated with a variety of human cancers, including hereditary cancers such as Li-Fraumeni syndrome. Alternative splicing of this gene and the use of alternate promoters result in multiple transcript variants and isoforms. Additional isoforms have also been shown to result from the use of alternate translation initiation codons (PMIDs:

12032546, 20937277). [provided by RefSeq, Feb
