

## Histone H3 (Acetyl Lys14) rabbit pAb

## Cat No.:ES7690

For research use only

## Overview

Produc t Name	Histone H3 (Acetyl Lys14) rabbit pAb
Host species	Rabbit
Applica tions	WB;IF;ELISA
Species Cross-R eactivit	Human;Mouse;Rat
y Recom mende d dilution	Western Blot: 1/500 - 1/2000. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/5000. Not yet tested in other applications.
S	
Immun ogen Specific	The antiserum was produced against synthesized peptide derived from human Histone H3 around the acetylated site of Lys14. AA range:1-50 Acetyl-Histone H3 (K14) Polyclonal Antibody detects endogenous levels of
ity	Histone H3 protein only when acetylated at K14.
Formul ation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Storage	Store at -20°C. Avoid repeated freeze-thaw cycles.
Protein Name	Histone H3.1/Histone H3.2/Histone H3.3
Gene Name	HIST1H3A/HIST1H3B/HIST1H3C/HIST1H3D/HIST1H3E/HIST1H3F/HIST1H3G /HIST1H3H/HIST1H3I/HIST1H3J/HIST2H3A/HIST2H3C/HIST2H3D/H3F3A/H 3F3B
Cellular localiza tion	Nucleus. Chromosome.
Purifica tion Clonalit	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Polyclonal

Backgr	Histones are basic nuclear proteins that are responsible for the
ound	nucleosome structure of the chromosomal fiber in eukaryotes. This
	structure consists of approximately 146 bp of DNA wrapped around a
	nucleosome, an octamer composed of pairs of each of the four core
	histones (H2A, H2B, H3, and H4). The chromatin fiber is further compacted
	through the interaction of a linker histone, H1, with the DNA between the
	nucleosomes to form higher order chromatin structures. This gene is
	intronless and encodes a replication-dependent histone that is a member
	of the histone H3 family. Transcripts from this gene lack polyA tails;
	instead, they contain a palindromic termination element. This gene is
	found in the large histone gene cluster on chromosome 6p22-p21.3.
