

## RT11 rabbit pAb

## Cat No.:ES9046

For research use only

## Overview

Product Name	RT11 rabbit pAb
Host species	Rabbit
Applications	WB;ELISA
Species Cross-Reactivity	Human;Rat;Mouse;
<b>Recommended dilutions</b>	WB 1:500-2000 ELISA 1:5000-20000
Immunogen	Synthesized peptide derived from human protein .
	at AA range: 10-90
Specificity	RT11 Polyclonal Antibody detects endogenous levels
	of protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and
	0.02% sodium azide.
Storage	Store at -20°C. Avoid repeated freeze-thaw cycles.
Protein Name	28S ribosomal protein S11, mitochondrial (MRP-S11)
	(S11mt) (Cervical cancer proto-oncogene 2 protein)
	(HCC-2)
Gene Name	MRPS11 RPMS11 HCC2
Cellular localization	Mitochondrion .
Purification	The antibody was affinity-purified from rabbit
	antiserum by affinity-chromatography using
	epitope-specific immunogen.
Clonality	Polyclonal
Concentration	1 mg/ml
Observed band	21kD
Human Gene ID	64963
Human Swiss-Prot Number	P82912
Alternative Names	
Background	Mammalian mitochondrial ribosomal proteins are
	encoded by nuclear genes and help in protein
	synthesis within the mitochondrion. Mitochondrial
	ribosomes (mitoribosomes) consist of a small 28S
	subunit and a large 39S subunit. They have an
	estimated 75% protein to rRNA composition

is reversed. Another difference between mammalian mitoribosomes and prokaryotic ribosomes is that the latter contain a 5S rRNA. Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a 28S subunit protein that contains a high level of sequence similarity with ribosomal protein S11P family members. A pseudogene corresponding to this gene is found on chromosome 20. Multiple transcript variants encoding different

Western blot analysis of lysates from SW480 cells, primary antibody was diluted at 1:1000, 4° over night
