

# Absolute Mag™ Glutathione Magnetic Agarose Particles, 6% Crosslinked, 30 µm

Cat.No: DNG-CB23-09

## DESCRIPTION

**Description** The pairing of an enzyme to its substrate is one of the most specific combinations in life sciences. This is why GST-tag purifications exploit this specificity to gain high levels of purity while maintaining a high protein yield. Absolute Mag™ Glutathione Magnetic Agarose Particles, 6% Crosslinked, 30 µm are used for this purpose.

## APPLICATION

**Application Notes** Specific binding and purification of GST-tagged proteins

## PRODUCT INFORMATION

<b>Particle Size</b>	30 µm
<b>Ligand</b>	L-Glutathione (Reduced)
<b>Concentration</b>	25% v/v
<b>Targets</b>	GST (Glutathione-S-Transferase)-tagged proteins
<b>Matrix</b>	6% agarose
<b>Binding Capacity</b>	>20 mg/mL
