

Absolute Mag™ Anti-GFP Magnetic Particles, 200 nm

Cat.No: WNM-YS23-04

DESCRIPTION

Description Absolute Mag™ Anti-GFP Magnetic Particles, 200 nm consist of carboxyl polymer magnetic particles and covalently coupled high quality murine IgG monoclonal antibody. These particles are superparamagnetic and with very low non-specific binding, which can be used for immunoprecipitation (IP) of protein with GFP tag.

APPLICATION

Application Notes IP

PRODUCT INFORMATION

Particle Size	200 nm
Ligand	Anti-GFP Antibody
Concentration	10 mg/mL
Binding Capacity	>0.6 mg protein/mL

STORAGE AND SHIPPING

Storage Buffer	ddH ₂ O
Storage	2-8°C. Do not freeze.
Shelf Life	1 year
