

DiagPoly™ Mouse Anti-FLAG M2 Polystyrene Particles, 2.0-2.4 µm

Cat.No: DNM-SP23-016

DESCRIPTION

Description	DiagPoly™ Mouse Anti-FLAG M2 Polystyrene Particles, 2.0-2.4 µm utilize a purified murine IgG1 monoclonal antibody covalently attached using EDC coupling, which bind to the FLAG fusion proteins. They can recognize the FLAG sequence at the N-terminus, Met N-terminus, and C-terminus.
