

DiagNano™ Gold Nanoparticles, Flow Cytometry, 200 nm

Cat.No: BG-200-FCM

DESCRIPTION

Description	200 nm Gold Nanoparticles for Flow Cytometry, supplied in 1ml solution and sufficient for approximately 100 runs.
--------------------	---

APPLICATION

Application Notes	Designed for optimization of flow cytometer settings, performance and evaluation of particles and organisms.
--------------------------	--

PRODUCT INFORMATION

Diameter	200 nm
-----------------	--------

Absorption Max	N/A
-----------------------	-----

STORAGE AND SHIPPING

Storage Buffer	0.1mM phosphate buffered saline (PBS)
-----------------------	---------------------------------------

Storage	Store product away from direct sunlight at 4-25°C. Do NOT freeze.
----------------	---

Shelf Life	When stored as specified the product is stable for at least six months.
-------------------	---
