

# DiagSupport™ Hydroxytrityl PEG-Polystyrene Particles, 280-320 µm, 0.15-0.3 mmol/g

Cat.No: SPS-RA23-105

## DESCRIPTION

|                    |                                                                                                                                                                                                                          |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b> | PEG-polystyrene particles are highlighted by extraordinary large particle diameters and high capacities based on the PEG-polystyrene technology and designed for single particle synthesis and single particle analysis. |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## PRODUCT INFORMATION

|                         |                 |
|-------------------------|-----------------|
| <b>Particle Size</b>    | 280-320 µm      |
| <b>Functional Group</b> | Hydroxytrityl   |
| <b>Capacity</b>         | 0.15-0.3 mmol/g |

---
