

Absolute Mag™ Aldehyde Magnetic Agarose Particles, 4% Crosslinked, 50-150 µm

Cat.No: WHM-24PA01-H

DESCRIPTION

Description Absolute Mag™ Aldehyde Magnetic Agarose Particles, 4% Crosslinked, 50-150 µm are magnetic agarose particles functionalized with aldehyde. They can react directly with the primary amine groups in molecules to be immobilized in the presence of reducing agents. They can be controlled and isolated with the use of a magnet.

PRODUCT INFORMATION

Particle Size 50-150 µm

Functional Group Aldehyde

Concentration 50% v/v

Matrix 4% agarose

STORAGE AND SHIPPING

Storage 2-8°C. Do not freeze.
