

Absolute Mag™ Magnetic Agarose Particles, 4% Crosslinked, 10-30 µm

Cat.No: WHM-B044

DESCRIPTION

Description	Magnetic agarose particles modified by hydroxyl, has faster magnetic responsiveness in suspension, good dispersibility, low non-specific adsorption, compared with the traditional magnetic particles. It can be modified into epoxies, carboxyl groups and amino groups under the special chemical reagents.
--------------------	---

APPLICATION

Application Notes	Used for enrichment, separation and purification of biomolecule (proteins, peptides, oligonucleotides, drug molecules, etc.)
--------------------------	--

PRODUCT INFORMATION

Particle Size	10-30 µm
Functional Group	Hydroxyl
Concentration	50% v/v
Matrix	4% agarose

STORAGE AND SHIPPING

Storage Buffer	DI water
Storage	2-8°C. Do not freeze!

TECHNOTES

TECHNOTES

Note: Recommend to store at 20% ethanol solution for long time preservation (2 years, at 2-8°C)
