

Absolute Mag™ Glutathione Magnetic Polystyrene Particles, 5 µm

Cat.No: WHM-G287

DESCRIPTION

Description	5 µm magnetic polystyrene particles consist of magnetite around an organic matrix of a polystyrene polymer, and finally coated with a polymer layer for the encapsulation of magnetite, with glutathione on the surface. These MNPs can easily be separated with conventional permanent magnets.

PRODUCT INFORMATION

Particle Size	5 µm
Ligand	Glutathione
Concentration	50 mg/mL
Number of Particles	7.0E+8 particles/mL
Size Distribution	< 5 % (C.V.)

STORAGE AND SHIPPING

Storage Buffer	Suspension in water
Storage	Storage at 2-8°C. Do not freeze!
