

Absolute Mag™ Aldehyde Magnetic Polystyrene Particles, 2 µm

Cat.No: WHM-G199

DESCRIPTION

Description	Absolute Mag™ Aldehyde Magnetic Polystyrene Particles, 2 µm (#WHM-G199) consists of magnetite around an organic matrix of a polystyrene polymer, and finally coated with a polymer layer for the encapsulation of magnetite. They are designed with aromatic aldehyde on the surface of particles, and can easily be separated with conventional permanent magnets. Standard deviation: < 5 % (C.V.).

PRODUCT INFORMATION

Particle Size	2 µm
Functional Group	Aldehyde
Concentration	50 mg/mL
Number of Particles	5.5 E+9 particles/mL

STORAGE AND SHIPPING

Storage	Storage at 2 - 8 °C.
----------------	----------------------
