

DiagPoly™ Goat Anti-Mouse IgG (H&L) Fluorescent Polystyrene Particles, Nile Red, 0.4-0.6 µm

Cat.No: DNM-SP23-038

DESCRIPTION

Description DiagPoly™ Goat Anti-Mouse IgG (H&L) Fluorescent Polystyrene Particles, Nile Red, 0.4-0.6 µm are used in FACS based cell-binding analysis method for detecting protein-protein interaction and phagocytosis studies where the number of internalized microspheres per cell was determined from flow cytometry fluorescence histograms.

PRODUCT INFORMATION

Diameter	0.4-0.6 µm
Ligand	Goat Anti-Mouse IgG (H&L) Antibody
Concentration	0.1% w/v
