

Cleaning and Disinfection Solutions

Reagecon's Cleaning and Disinfection Solutions are developed and designed to provide optimum cleaning and sanitisation in laboratories and processing plants. These ready-to-use products eliminate the need for diluting solutions in-house (together with the associated risks of handling strong oxidizers) and save time, resources and cost in their purchase, production and storage.

Sodium Hypochlorite Solutions

- ✔ Various concentrations that delivery from 0.3% - 7% available chlorine.
- ✔ Recommended for general disinfection of laboratory equipment and apparatus, including benches, sinks, floors and contact surfaces (not stainless steel)
- ✔ Sanitisation of production areas and processing equipment
- ✔ As effective as Chlorine Gas

IPA and Ethanol Solutions

- ✔ Products contain from 30 - 70% IPA or 70% Ethanol
- ✔ High quality antimicrobial (bactericidal/viricidal) disinfectant
- ✔ Highly effective in cleaning and sanitisation of laboratory, production and processing areas and equipment (not stainless steel).

PROPERTIES OF REAGECON'S SANITISERS AND DISINFECTANTS

| | Optimum pH range for Sanitisation | Germicidal Activity | Activity against Gram Positive Bacteria | Activity against Gram Negative Bacteria | Activity against Spores | Viricidal |
|--------------|-----------------------------------|---------------------|---|---|-------------------------|-----------|
| Hypochlorite | 5-7 | High | ●●●● | ●●●● | ●●●◇ | ●●●◇ |
| Alcohols | 5-8 | Moderate | ●●●◇ | ●●●● | ◇◇◇◇ | ●●●◇ |

●●●● Highly Effective ●●●◇ Moderately Effective ◇◇◇◇ Ineffective
