

Multiple Applications

- Spheroid culture
- Tumor-stroma modeling
- Neuronal outgrowth
- Epithelial cyst formation
- In vivo applications (animals only)
- On-chip applications
- Microarray
- Drug screening/testing
- Mechanotransduction
- Migration assays
- Chemotaxis
- Microsphere production
- Robotic handling

3-D Life Hydrogels:

The toolbox for innovative 3-D cell environment design

- Off-the-shelf products
- Bulk delivery of reagents
- Customized reagents
- Services for academic and industrial entities to explore and develop the use of the 3-D Life technology in cell-based assays and tissue models for drug screening and biomedical engineering
