I Introduction to Elabscience®

Expertise in Cell Detection, Providing One-stop Solution for Cell Detection

Elabscience® specializes in cell detection technology for the life science community. We have complete platforms for both R&D and manufacturing. Additionally, we have in-house QC for every product, ensuring consistent and precise experimental results. Through continuous effort and development, we have been able to offer our products across various geographical locations, with customers in more than 150 countries and regions worldwide.

Elabscience® Group consists of four brands: Elabscience, DIA•AN, Pricella, and Uni-science. Each brand operates in its own domain, manufacturing Flow Cytometry Antibodies, Cell Metabolic Assay Kits, ELISA Kits, Cell and Related Culture Reagents, Cell Function Detection Kits, Antibody & Protein Raw Materials, and IVD Products. All of these products have passed ISO9001 international certification and EU CE certification.

Our group is proud to have over 12,000 m² of office space and a 15,000 m² production facility equipped with a sophisticated GMP-certified clean room and an impeccable quality management system. 1/3 of our team over 700 have advanced degrees who drive our innovation and success.

Technology Platforms

■ Technology Platforms: Provide Customers with Comprehensive Cell Detection-related Products and Services

Elabscience® capitalizes on its comprehensive strengths within the biotech value chain to create five specialized technology platforms: **Protein Expression**, **Immunology**, **Cell Model and Function Detection**, **Cell Metabolism Detection**, and **Antibody Customization**. With a focus on innovative R&D and stringent quality assurance, Elabscience® provides researchers worldwide with high-caliber, dependable experimental tools and scientific support.

■ Professional Teams: Provide One-stop Services from Pre-sales to After-sales, from Products to Experimental Solutions

**R&D Team**

Specialized with advanced cell detection project experience, focuses on the cutting-edge market, empowers customers to achieve high-level scientific and technological achievements of transformation and innovation.

**Customer Service Team**

24 hours online response, professional service.

**Technical Team**

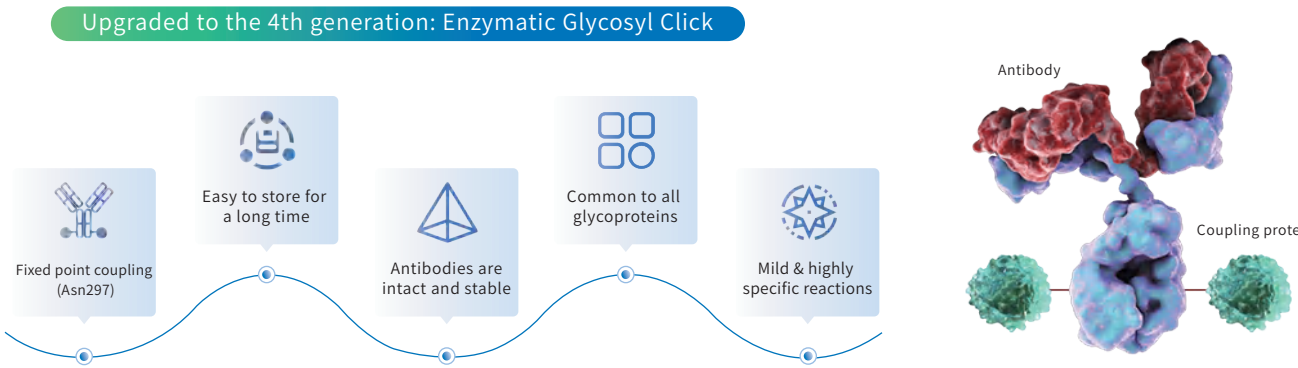

A technical team composed of 100+ professionals with advancing practical experience to provide solutions for customers' needs.

**Sales Team**

Understand the needs of distributors, and quickly provide the best market solutions.

■ Technological Innovation: Provide Cutting-Edge Products and Upgraded Services with Continuous R&D

≡ Protein Labeling Process Upgrade iteration: Complex biochemical labeling into simple building blocks

≡ Fluorescent Polymer Labeling: Based on multi-arm long chain skeleton, with high brightness labeling

▲ Random Labeling    ▲ Poly-dyes with Directional Labeling    ▲ Change of Staining Index with F/P Ratio

≡ Series Dyes Labeling: Realize the color world under single wavelength excitation

■ 40+ Authorized Patents. Products were cited in 18800+ SCI publications

One-stop Products and  
Services for Customers

Global Trust

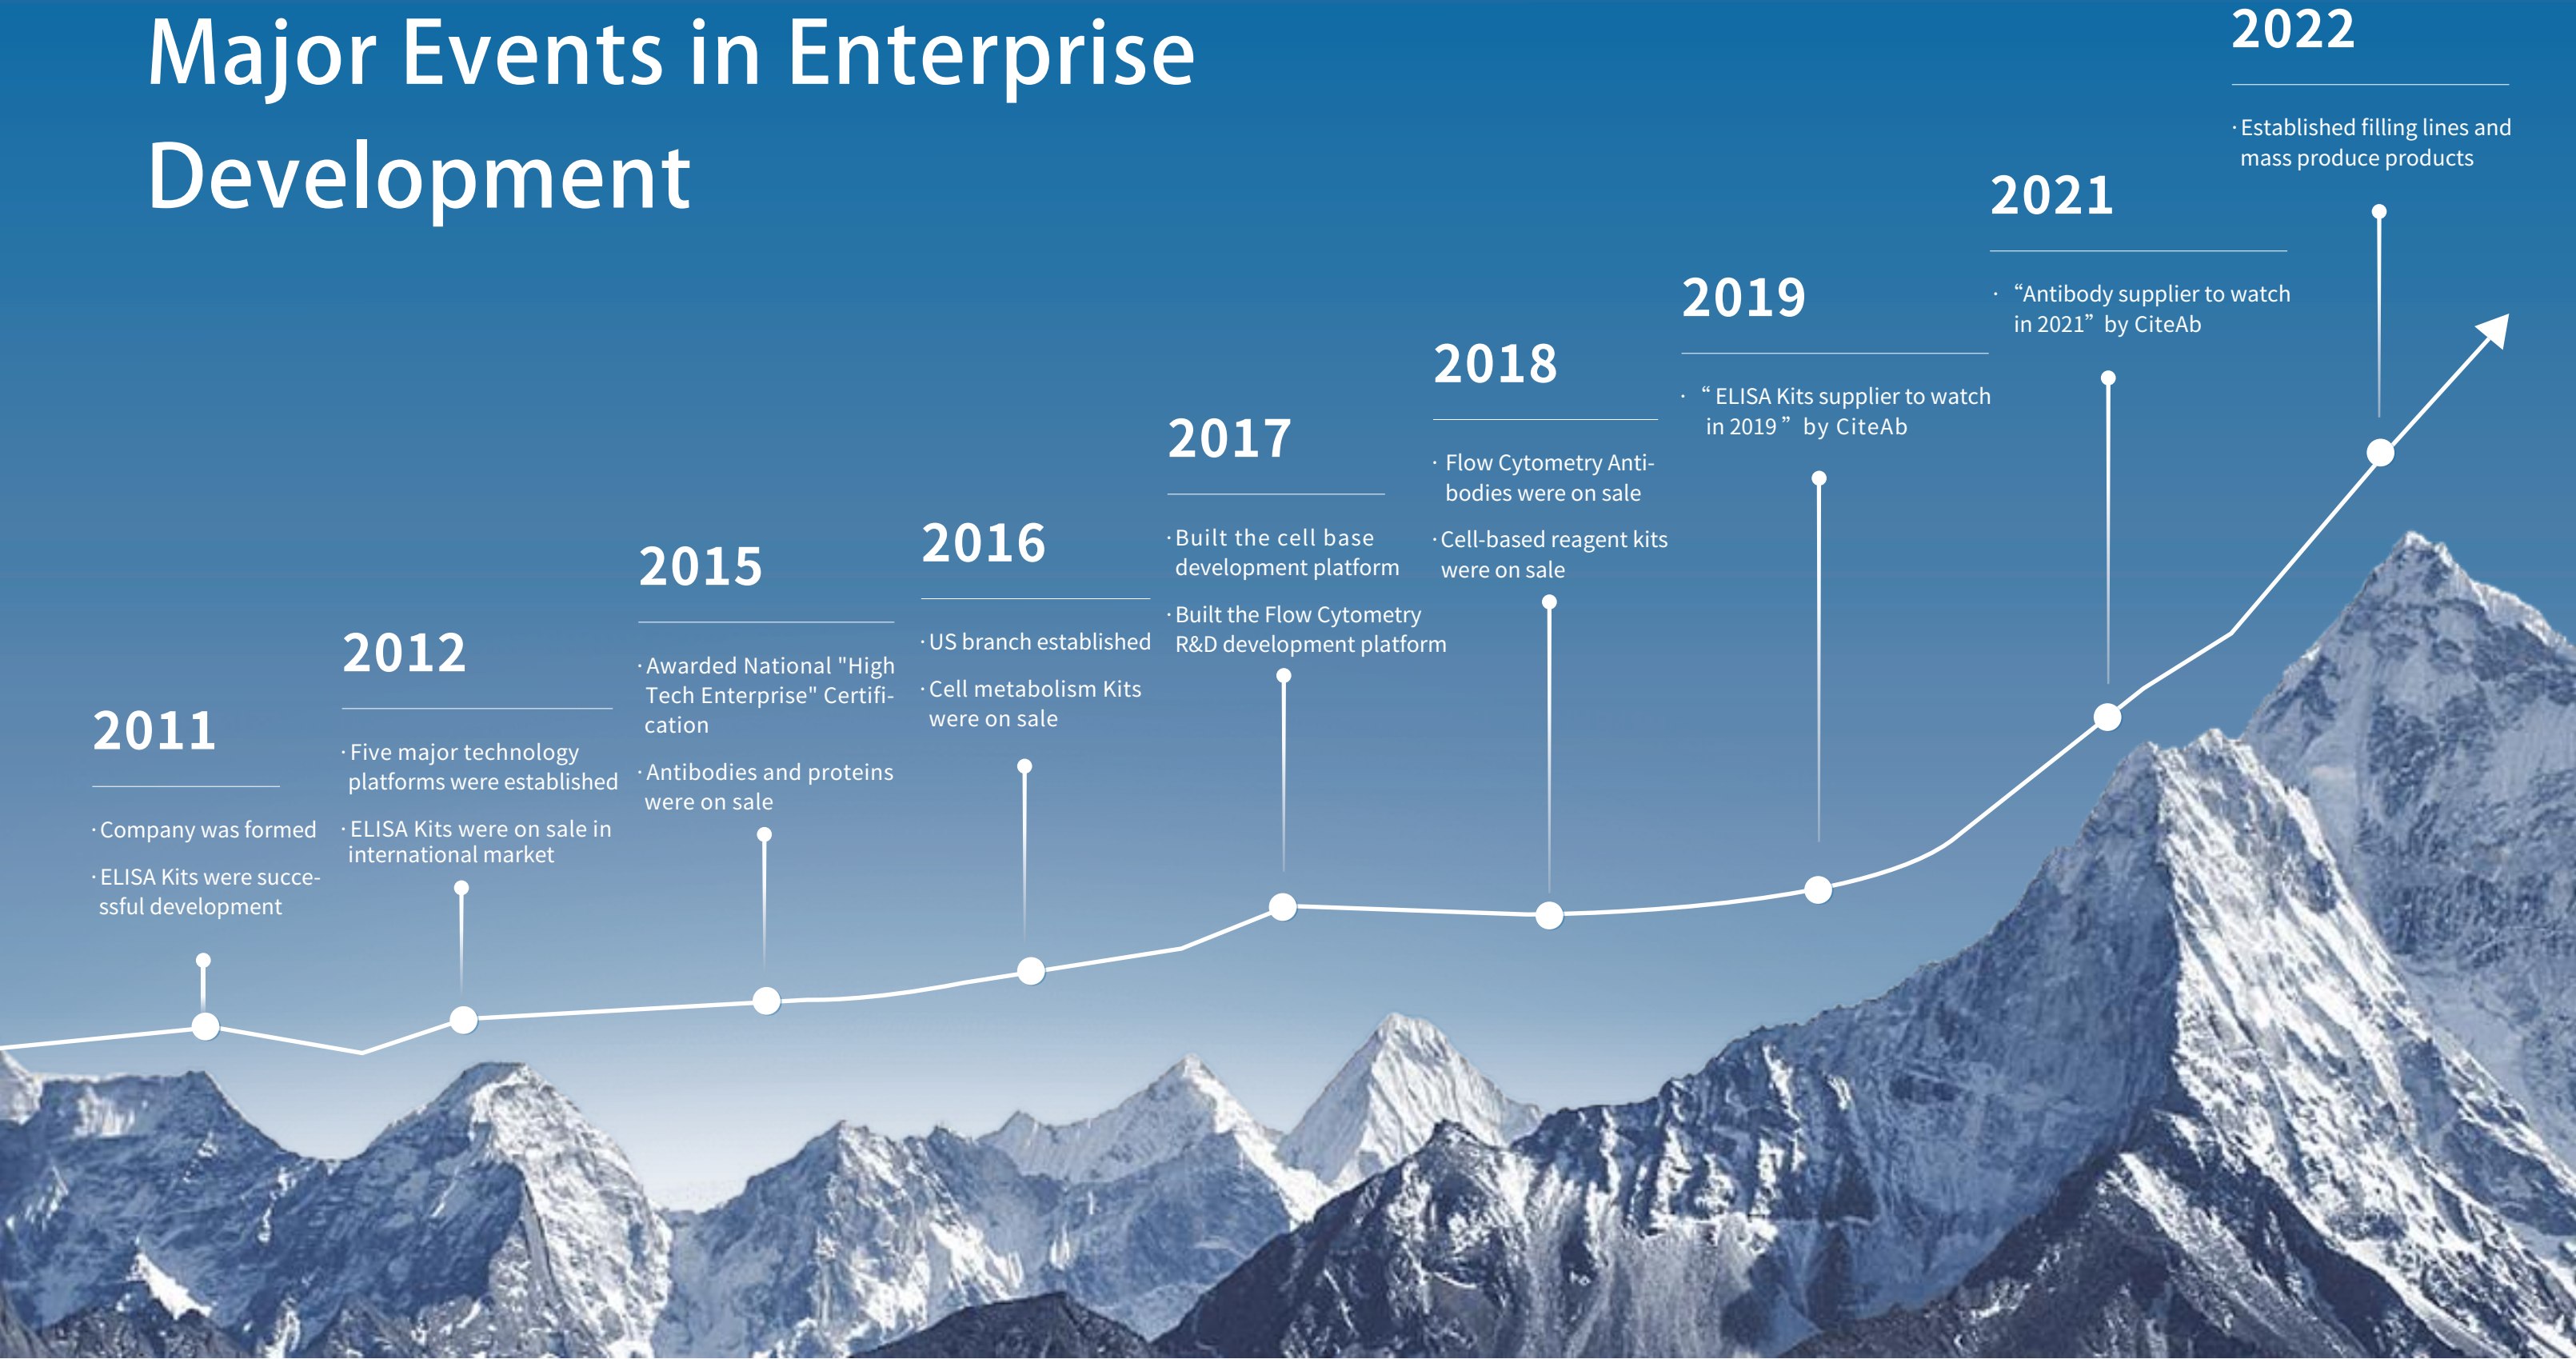

Elabscience® Has Become  
a Globally Renowned  
Supplier

Thoughtful Service

Technical Support  
Provide Solutions within  
24 Hours

■ More than Ten Years of Professional Cultivation, Achieving Excellent Quality

# Major Events in Enterprise Development

# Product Line Introduction

Expert in Cell Detection, Providing One-Stop Solution

Elabscience® group combines the advantages of the industry chain, and consistently carries out technological innovation, possesses the remarkable technology, creates excellent R&D strength, adheres to high standards of quality control system, and provides professional and reliable products and services for global biotech researchers.

# Flow Cytometry Antibody

A Trustworthy Supplier of Flow Cytometry Antibody

After more than 7 years of growth and accumulation, Elabscience® has 3300+ Flow Cytometry Antibodies, covering anti-human/rat/mouse, etc., rich indicators to meet the needs of customers Flow Cytometry detection. At the same time, Elabscience® can provide the necessary reagents for Flow Cytometry experiments, including isotype controls, fluorochromes, labeling kit, and FCM reagents for intracellular factor detection such as fixed membrane permeabilization and cell stimulation and protein transport inhibitor. In addition, Elabscience® also provides customers with high-quality services, including free Flow Cytometry panel design, data analysis, etc.

## Rich Indicators and 16 Kinds of Fluorochromes to Meet the Diversity of Flow Cytometry Detection Needs

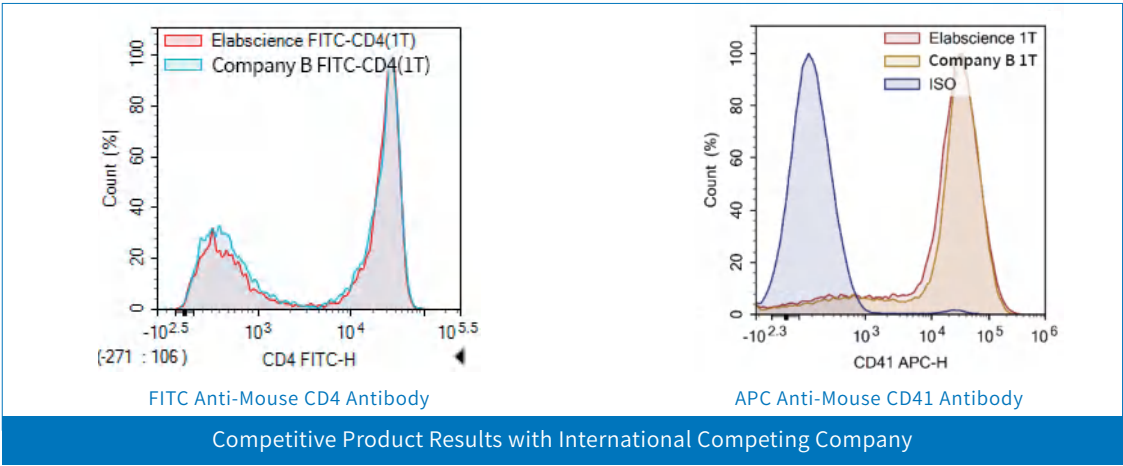

©There are 16 fluorochromes available, and more fluorochromes labeled Flow Cytometry Antibodies are coming to market.

©Selecting classic clone cited in publications as the source of Flow Cytometry Antibodies, with abundant markers.

Fixed Point Non-Destructive Labeling Technology, Product Quality is Reliable

Self-Developed, With More Guaranteed Quality

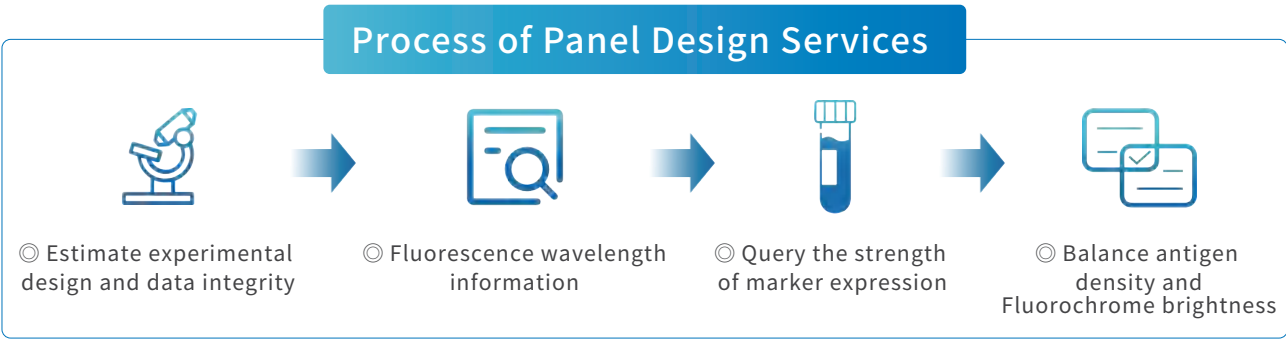

Elabscience® Flow Cytometry Antibodies are locally developed, regular indicators stock, can quickly respond to customer needs, and reduce the impact of transportation time on product quality.

Professional Team to Provide Value Services, Free Flow Cytometry Panel Design and Data Analysis

Elabscience® has featured service including product pre-sale recommendation, after-sales service, Flow Cytometry panel design, data analysis and can help customers solve pre-sale and after-sales problems, provide help for customers to set up experimental schemes, analysis of experimental results, and help customers get accurate and ideal experimental results.

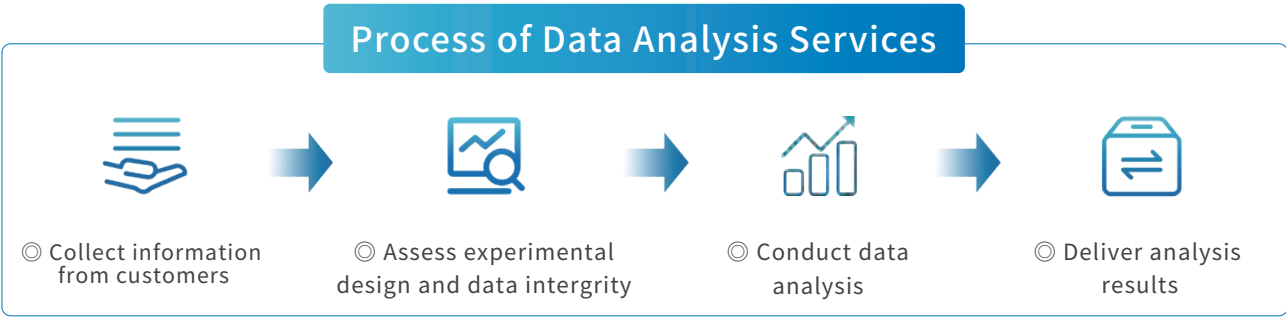

Elabscience® Professional Flow Cytometry Panel Design Service

Provided with Flow Cytometry experimental indicators (specificities, logical relationships or references, expression level softarget maker) and basic information of Flow Cytometer (laser, detection channel, filter information), Elabscience® will offer professional and free Panel Design Services based on your experiments.

Elabscience® Professional Flow Cytometry Data Analysis Services

Elabscience® provides professional Data Analysis Services for free! It's available to our product users once they provide FCS format data and markers' logical relationships to our technical support.

Flow Cytometry Antibody High IF Publications

In 2018, Elabscience® launched the Flow Cytometry Antibody series, and since then, the number of publications published by customers using Elabscience® Flow Cytometry Antibody has increased year by year, and the growth trend is stable. By the end of December 2023, there were **252** high-score articles published using Elabscience® Flow Cytometry Antibody, of which **67** articles had an impact factor  $\geq 10$ , and the highest IF was **37.8 (Circulation)**. The increase in the number of publication citations indicates that Elabscience® Flow Cytometry Antibody has entered the attention of a large number of researchers, and the increase in the number of publication citations in the future is worth looking forward to.

## Elabscience® Hot Flow Cytometry Antibody

Cell Type	Reactivity	Maker		
T Cell	Human	CD3-PE	CD4-FITC	CD8a-APC
	Mouse	CD3-PE	CD4-FITC	CD8a-APC
B Cell	Human	CD3-FITC	CD19-APC	
	Mouse	CD3-FITC	CD19-APC	
NK Cell	Human	CD45-APC	CD3-FITC	CD16-PE CD56-PE
	BALB/c Mouse	CD3-FITC	CD49b-APC	
	C57BL/6 Mouse	CD3-FITC	NK1.1-APC	
Th1/Th2 Cell	Human	CD3-Per/Cyanine5.5	CD4-FITC	IFN-γ-PE IL-4-APC
	Mouse	CD3-Per/Cyanine5.5	CD4-FITC	IFN-γ-PE IL-4-APC
Th17 Cell	Human	CD3-Per/Cyanine5.5	CD4-FITC	IL-17A-PE
	Mouse	CD3-Per/Cyanine5.5	CD4-FITC	IL-17A-PE
Treg Cell	Human	CD4-FITC	CD25-PE	CD127-APC
	Mouse	CD4-FITC	CD25-PE	FOXP3-APC

For more phenotype, please visit our website: [www.elabscience.com](http://www.elabscience.com).

## Elabscience® Labeling Kits and Related Products

At present, there are 20 Elabscience® labeling kits, including 15 fluorochrome labeling kits and 5 biotin labeling kits. Each labeling kit is available in three ultrafiltration tube sizes to meet different molecular weight protein/antibody labeling needs.

### Fluorochrome

Cyanine 3	Cyanine 5	Cyanine 7	Cyanine 5.5	Elab Fluor® 430
Elab Fluor® 680	Elab Fluor® 488	Elab Fluor® 700	Elab Fluor® 568	Elab Fluor® 750
Elab Fluor® 594	Elab Fluor® Violet 450	Elab Fluor® 647	FITC	Elab Fluor® 780

### Biotin

- Chromogenic Biotin
- Biotin
- Long-arm Biotin
- Water-soluble Biotin
- Water-soluble Long-arm Biotin

### BSA Removal Kit

Cat. No.	Product Name	Size
E-LK-R002	BSA Removal Kit	10 Reaction

## Elabscience® Fluorochrome Dyes

Cat. No.	Product Name	Excitation Laser Lines (nm)	Excitation Max (nm)	Emission Max (nm)
E-FN-N102	PE (R-Phycoerythrin)	488/561	495, 565	575
E-FN-N103	APC (Allophycocyanin)	633	650	660
E-FN-N104	PerCP (Peridinin-Chlorophyll-Protein Complex)	488	440, 480, 675	675
E-FN-L103	Cross-linked APC	633	650	660
E-FN-S102	SMCC Activated R-PE	488/561	495, 565	575
E-FN-S103	SMCC Activated APC	633	650	660
E-FN-S104	SMCC Activated PerCP	488	440, 480, 675	675
E-FN-S101	SMCC Activated Peroxidase (HRP)	—	—	—

For more phenotype, please visit our website: [www.elabscience.com](http://www.elabscience.com).

FCM Reagents

Elabscience® offers a wide range of Flow Cytometry reagents, including red blood cell lysis, cell stimulation and protein transport inhibitor, buffer, nuclear staining, cell fixation/permeabilization, FcR blocking and other Flow Cytometry reagents to help customers successfully conduct Flow Cytometry experiments.

Product Categories	Cat. No.	Product Name	Application
Red Blood Cell Lysis	E-CK-A105	10×ACK Lysis Buffer	Red Blood Cell Lysis
	E-CK-A106	10× RBC Lysis/Fixation Solution	Red Blood Cell Lysis
Cell Stimulation and Protein Transport Inhibitor	E-CK-A091	Cell Stimulation and Protein Transport Inhibitor Kit	Stimulation/Transport Inhibitor
	E-CK-A019	Cell Stimulation MIX Kit	Cell Stimulation
	E-CK-A013	Protein Transport Inhibitor MIX	Protein Transport Inhibitor
Buffer	E-CK-A107	Cell Staining Buffer	Dilution and Wash
Nuclear Staining	E-CK-A161	PI Reagent	Nuclear Staining
	E-CK-A162	7-AAD Reagent	Nuclear Staining
	E-CK-A163	DAPI Reagent	Nuclear Staining
Cell Fixation/Permeabilization	E-CK-A108	Foxp3/Transcription Factor Staining Kit	Fixation/Permeabilization
	E-CK-A109	Intracellular Fixation/Permeabilization Buffer Kit	Intracellular Fixation/Permeabilization
FcR Blocking	E-AB-F0997A	Purified Anti-Mouse CD16/32 Antibody	Mouse Sample Blocking
	E-AB-F1236A	Purified Anti-Human CD16 Antibody	Human Sample Blocking

IV Cell Function Detection Assays

Provide Customers with One-stop Solutions for Cell Function Detection

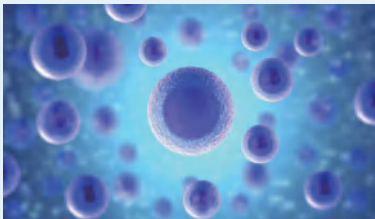

The key to cell related research is cell function detection. Elabscience® provides various Cell Function Detection Assays to assist customers in cell related research.

Rich Categories Meet the Diverse Needs of Cell Function Detection

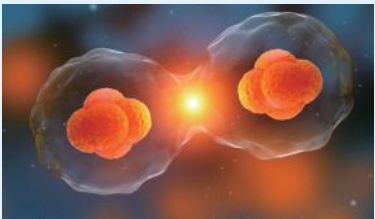

**Apoptosis detection**

- ◎ Annexin V Apoptosis Kit
- ◎ TUNEL Apoptosis Kit
- ◎ Mitochondrial Assay Kits
- ◎ Caspase Activity Assay kit

**Cell proliferation/viability/cytotoxicity detection**

- ◎ CFSE Cell Division Tracker Kit
- ◎ Calcein AM/PI Double Staining Kit
- ◎ E-Click EdU Cell Proliferation Detection Kit
- ◎ CCK-8 cell viability detection kit
- ◎ LDH cytotoxicity detection kit

**Cell cycle detection**

- ◎ Cell cycle detection kit (red)
- ◎ Cell cycle detection kit (blue)
- ◎ Cell cycle detection kit (green)

Professional Team, Providing Reliable Products and Quality Services

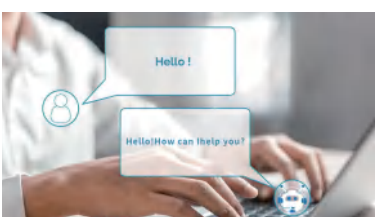

**Professional R&D team**

The R&D team has a Ph.D. ratio of up to 50%, generating a robust professional environment and a fully integrated industrial ecosystem.

**Strong production and quality inspection team**

Elabscience® Cell Function Detection Assays undergo stringent quality control procedures and comprehensive comparative verification to ensure exceptional quality and optimal performance.

**Mature technical support team**

A technical support service team to provide you with a full range of technical guidance within 24 hours and ensures worry-free after-sales service.

Key Raw Materials are Self-developed, Product Quality is Reliable and Cost-effective

**Based on Dia-An Biotechnology**

A high-tech team with more than 20 years of experience in protein and enzyme development, provides Elabscience® with high-quality raw materials.

**Relying on five characteristic technology platforms**

Through characteristic technology platforms we provide professional and reliable products.

**Strictly control product quality**

All products must assess ISO 9001 and ISO 13485 certification, to ensure stable product quality.

High Efficiency and Sensitivity of Cell Function Detection Assays, Has Been Widely Recognized and Praised. Cited by 700+ SCI Publications

By the end of Dec. 2023, there has been **720** SCI publications using Elabscience® cell function detection products, with a cumulative IF of **4207.8**. The highest IF achieved is **64.5** (*Cell*).

Product Name	Cat. No.	Citation Quantity	IF
Annexin V-FITC/PI Apoptosis Kit	E-CK-A211	202	1117.0
Enhanced Cell Counting Kit 8 (WST-8/CCK8)	E-CK-A362	92	570.5
Annexin V-APC/7-AAD Apoptosis Kit	E-CK-A320	89	603.5
Cell Cycle Assay Kit (Red Fluorescence)	E-CK-A351	44	202.6
Annexin V-APC/PI Apoptosis Kit	E-CK-A217	38	223.7

For more published information, please visit our website: [www.elabscience.com](http://www.elabscience.com).

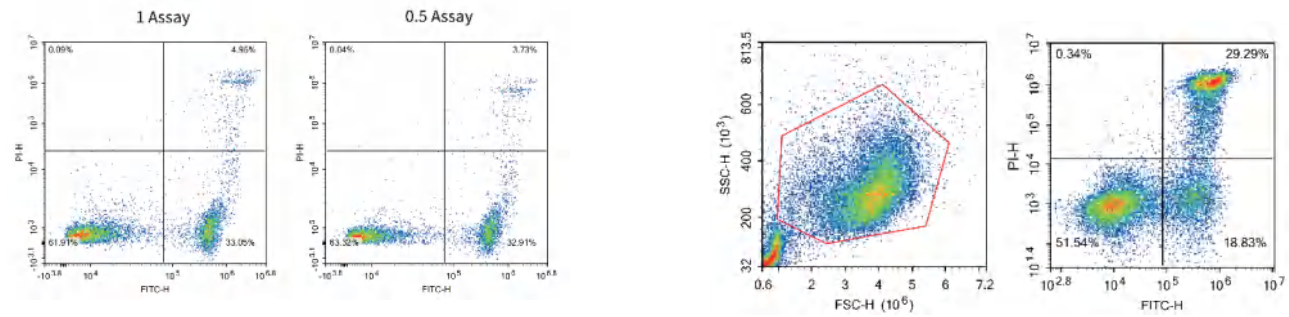

Star Products—Annexin V Apoptosis Detection Kits

Annexin V is an effective method to distinguish early apoptosis, late apoptosis. Elabscience® has developed Annexin V Apoptosis Detection Kits with combining 15 fluorochromes and 3 nucleic acid dyes for multiple research requirements.

Features of Elabscience® Annexin V Apoptosis Detection Kits

- Multiple Options: 15 fluorochromes × 3 nucleic acid dyes
- High Accuracy: Ideal for early apoptosis detection and no fixation-related false positive
- Quick & Simple Operation: Only 15~20 min hand-on time
- Strict QC: Developed in house, traceable and reliable quality
- Cost-effectiveness: 1 Assay can be used as 2 Assays based on 10<sup>6</sup> cells

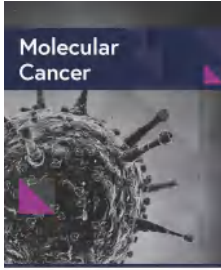

Results of Elabscience® Annexin V Apoptosis Detection Kits

Jurkat cells were treated with 5 μM camptothecin for 4 h and harvested 1 × 10<sup>5</sup> cells, detected with Annexin V-FITC/PI kit (E-CK-A211) of different specifications.

Jurkat cells were treated with 5 μM camptothecin for 4 h, harvested 1 × 10<sup>6</sup> cells, detected with Annexin V-FITC/PI kit (E-CK-A211).

By the end of Dec. 2023, there has been **307** SCI publications using Elabscience® Annexin V Apoptosis Kit, and the total IF of the publications has reached **1724.5**, of which the highest IF is **41.4** (*Molecular Cancer*), and the popular product (Annexin V-FITC/PI Apoptosis Kit (E-CK-A211) has been cited 202 times, with a cumulative IF of **1117**.

Title: MARCKSL1–2 reverses docetaxel-resistance of lung adenocarcinoma cells by recruiting SUZ12 to suppress HDAC1 and elevate miR-200b

IF: **41.4**      Journal: *Molecular Cancer*

Elabscience® product: Annexin V-FITC/PI Apoptosis Kit (E-CK-A211)

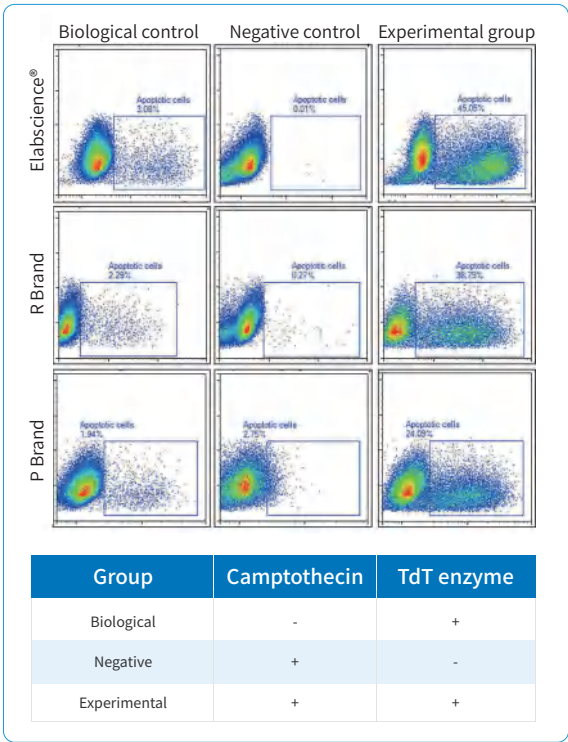

Star Products—Tunel Apoptosis Detection Kits

Elabscience® Tunel Apoptosis Detection Kit, including the One-step TUNEL In Situ Apoptosis Kit, One-step TUNEL Flow Cytometry Apoptosis Kit, and TUNEL In Situ Apoptosis Kit (HRP-DAB Method), can be used for apoptosis detection on tissue (paraffin-embedded, frozen section) and cells samples (cell smears, cell crawling films, suspension cells, adherent cells) with a Microscope or Flow Cytometer.

Features of Elabscience® One-step TUNEL In Situ Apoptosis Kits

- ◎ Cost-effective: The key components (TdT & fluorescein-dUTP) are self-developed and have stable performance
- ◎ Safe and non-toxic: No dimethyl arsenate, non-toxic and harmless to humans and environment
- ◎ Multiple Options: A variety of fluorescent dyes (FITC/ Elab Fluor® 488/ Elab Fluor® 594/ Elab Fluor® 647/ Elab Fluor® 555) are available
- ◎ Easy to operate: One-step dyeing, saving time and effort
- ◎ Diverse options: Various detection methods (Fluorescence microscope/ Flow Cytometer/ Optical microscope)

Results of Elabscience® TUNEL Apoptosis Detection Kits

By the end of Dec. 2023, there has been **181** SCI publications using Elabscience® TUNEL Apoptosis Detection Kits, and the total IF of the publications has reached **1248.2**, of which the highest IF is **64.5** (*Cell*), and the popular product (One-step TUNEL In Situ Apoptosis Kit (Green, FITC) (*E-CK-A320*) has been cited 89 times, with a cumulative IF of **603.5**.

Title: Manuscript title: Prolonged sleep deprivation induces a cytokine-storm-like syndrome in mammals

IF: 64.5      Journal: *Cell*

Elabscience® product: One-step TUNEL In Situ Apoptosis Kit (Green, Elab Fluor® 488) (*E-CK-A321*)

Other Cell Function Detection Assays

【Apoptosis】

Caspase

Caspase1/2/3/4/6/7/8/9.  
For detecting the activation of Caspase protein during apoptosis/pyroptosis.

Mitochondrial Assay Kits

Mitochondria are double-membrane organelles involved in energy production, metabolism, signaling, autophagy, aging, and tumorigenesis.

Cell Cycle

Using the property that intracellular DNA can bind to fluorochrome (such as propidium iodide-PI). The DNA content of cells in different stages is different, so the amount of bound fluorescent dye is different.

【Cell Proliferation / Cytotoxicity / Viability】

CFSE

CFSE can stably bind to cells and evenly distribute fluorochrome substances to the next generation to directly detect cell division.

EdU

EdU can be integrated into the double-stranded DNA in the synthesis phase and directly reflects cell proliferation by detecting the proportion of cells in S phase.

Calcein AM/PI

Calcein AM labels live cells, and PI labels dead cells. It can detect cell activity and cytotoxicity simply, quickly, sensitively and accurately.

CCK-8

Based on the reduction of WST-8 to produce water-soluble orange-yellow Formazan, and widely used in cell viability and cytotoxicity testing.

# V Cell Metabolism Assay Kits

## Leading Brand of Cell Metabolism Assay

Elabscience® consistently focuses on market demand and adheres to research hotspots to provide one-stop solutions for cell metabolism assay. According to the applications, it is categorized by cell component extraction reagents, metabolism assay kits, and inhibitory screening kits to meet different research needs.

**Cell Component Extraction Reagent**  
Cellular, protein and multi -component extraction

**Metabolism Assay Kit**  
Detection of cellular metabolites, and metabolic functions

**Inhibitor Screening Kit**  
Screening of small molecule inhibitors of various enzymes

### Cell Metabolism Assay Kit Research Areas

Oxidative Stress

Ferroptosis

Liver & Renal function

Energy Metabolism

Cuproptosis

TCA Cycle

Mitochondria Function

Glycolysis & Lipid Metabolism

Amino Acids & Proteins

Plant Physiology

Inorganic Ions

Metabolic Diseases

### Fluorescence Assay Kits

The fluorescence assay kits adopt the detection principle of “enzyme + fluorescent probe”, which improves the sensitivity and specificity of the kits, and solves the problem caused by large amount of cell samples and undetectable indicators.

#### Comparison between colorimetric and fluorescent methods

Detection principle		Fluorescence	Colorimetric
Similarities		Molecular spectroscopy	
Difference	Detection spectroscopy	Emission spectroscopy	Absorption spectroscopy
	Sensitivity	10 <sup>-8</sup> -10 <sup>-10</sup> g/mL	10 <sup>-5</sup> -10 <sup>-7</sup> g/mL
	Specificity	High	Low
	Platform	Fluorescence Microplate	Microplate Reader/ Spectrophotometer

- High performance: Mature manufacturing, performance comparable to famous brands

The sensitivity comparison between Elabscience® and competing brand.

- High sensitivity: It can reach 10<sup>-8</sup>-10<sup>-10</sup> g/mL, and can detect indicators with lower concentrations in samples.

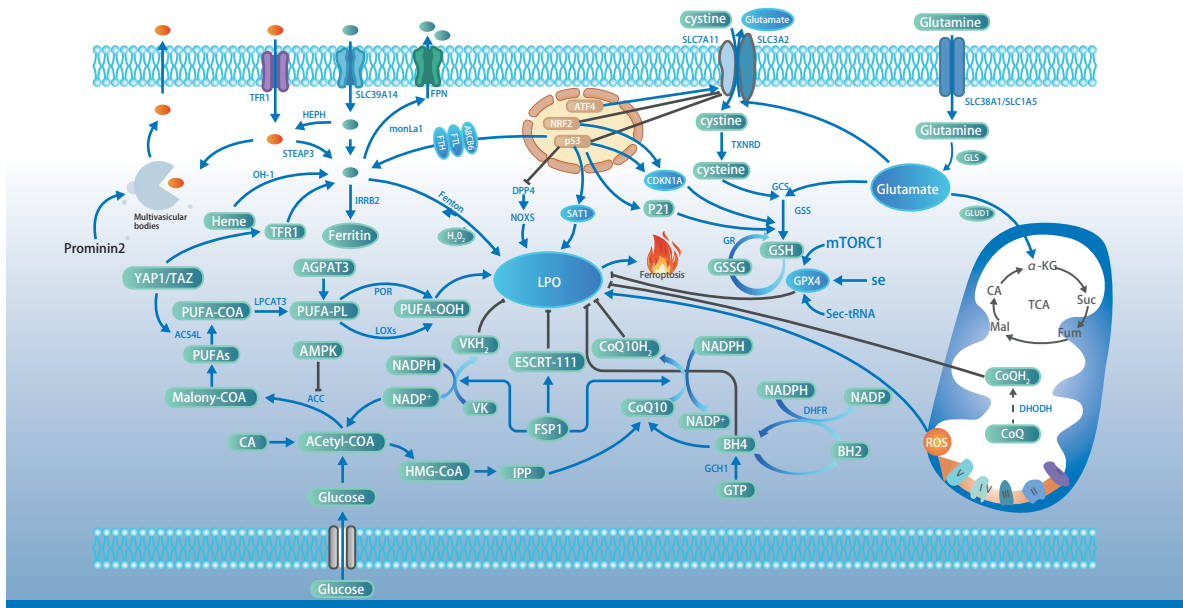

Detection results of Glucose and FFA by colorimetric and fluorescence methods respectively.

Ferroptosis Assay Kits

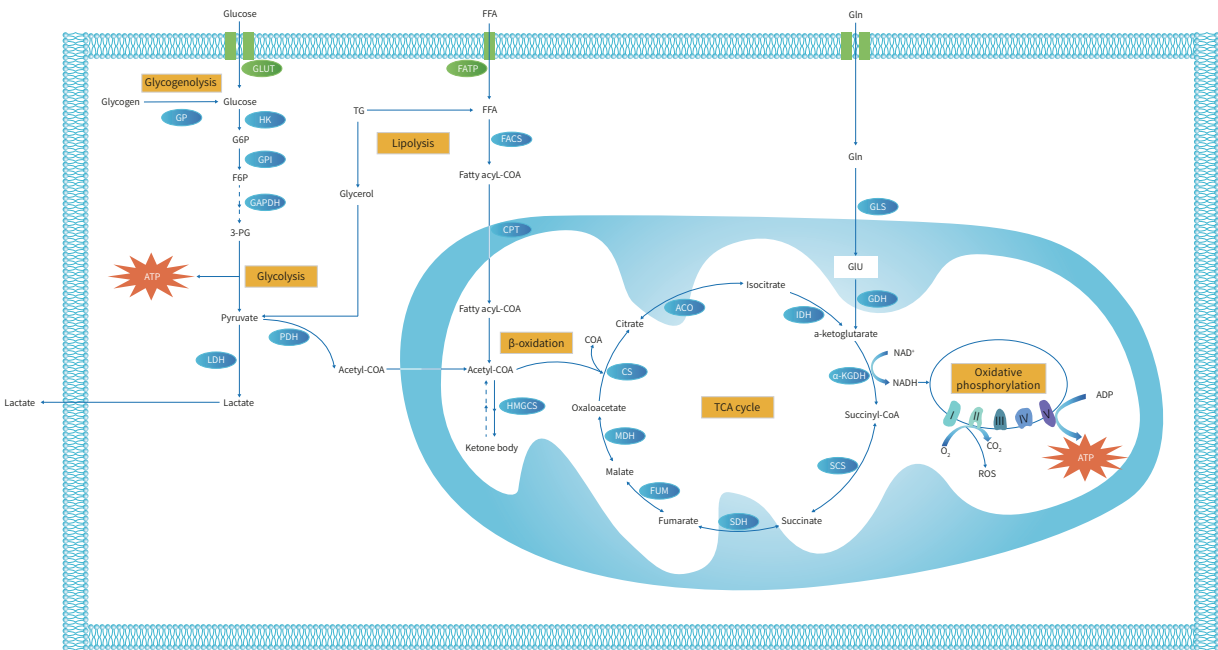

Ferroptosis is a regulated cell death caused by an imbalance in the generation and degradation of intracellular lipid reactive oxygen species. It is iron-dependent, characterized by increased free ferrous ions and accumulation of lipid peroxides. Ferroptosis is one of the most popular research topics in cell death. Elabscience® offers self-developed assay kits to facilitate research on ferroptosis.

Pathway of ferroptosis and related markers

Energy Metabolism Assay Kits

Energy metabolism involves various metabolic pathways, including glycolysis, lipid metabolism, the TCA cycle and oxidative phosphorylation. Elabscience® have independently developed a series of assay kits, such as extra-cellular acidification rate, cellular oxygen consumption and ATP, supporting research in energy metabolism.

Pathway of energy metabolism and related markers

Star Products

GPX4: Globally initiate to measure GPX4 enzyme activity

Glutathione Peroxidase 4 (GPX4) Activity Assay Kit

Cat. No.: E-BC-K883-M

LPO: High sensitivity, suitable for living cells

VI Immunoassay Kits and Reagents  
More Reliable ELISA Kits!

Elabscience® has been focused on cell detection products for 14 years and provides researchers with more than 2,000 high-quality ELISA Kits and EcoPlex™ Kits. Our ELISA product covers human, mouse, rat, rabbit, monkey, universal and other reactive species.

Superior Quality

All Elabscience® ELISA products are manufactured according to ISO 9001:2015 and are guaranteed by a strict quality control system.

**Raw Material**

Professional antibody & protein development and production platform for ELISA products to continue to supply high-quality and stable raw materials.

**Production**

Automated production equipment, international standard production process.  
Accurately control the freeze-drying curve to reduce production errors.

**Quality Inspection**

Strict three-step quality inspection to ensure the stability of the system, quality and quantity.

**Reagent**

- Improved coating system to reduce coated protein damage.
- Unique HRP enzyme protection solution to avoid data fluctuation.

**Package**

- Aluminum foil bags are carefully selected and subjected to low-temperature simulation anti-fall experiments.
- The product has a traceable security code, which can be directly traced to each production link.

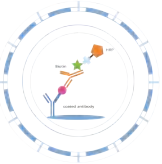

**Quality Control Standard**

- Standard Linearity**  
R<sup>2</sup>≥0.995.
- Sensitivity**  
The low concentration target sensitivity reaches fg/pg level.
- Precision**  
Intra-batch & inter-batch CV≤10%.
- Recovery Rate**  
Addition & dilution recovery rates range from 80% to 120%.
- Specificity**
  - Cross-reaction rate of structural analogues<10%.
  - Cross-reaction rate of samples between different species<10%.
- Stability**  
Through thermal acceleration stability, long-term stability and transportation stability tests, the kit has good stability within the validity period.
- Sample Test**
  - Human source kits: serum, plasma, cell supernatant & lysate, saliva, urine, and milk, etc.
  - Mouse and Rat kits: serum, plasma, cell supernatants & lysates, tissue homogenates (heart, liver, spleen, lung, kidney, brain), etc.
  - The sample testing is basically consistent with authoritative literature reports.

Customer Oriented

New Product Development is Guided by Customer Needs

Traditional ELISA

- Rich targets
- Complete species
- Mature system

2009

- Double-antibody sandwich method and competition method are used to develop more ELISA indicators.

2020

- QuicKey ELISA® kit optimizes the 3 steps sandwich method to 2 steps.
- In the early stages of the COVID-19 epidemic, a number of SARS-CoV-2 antigen and antibody detection kits were developed to meet the needs of disease-related scientific research in a timely manner.

QuicKey ELISA®

- 2 steps
- Easy to store

SARS-CoV-2 ELISA

- Contains Ag, Ab, NAb, TAB

2021

- QuicKey Pro™ (One-Step) ELISA kit helps customers complete ELISA experiments in 90 minutes.
- Micro-method Mini Sample ELISA kit can save 75% of sample consumption.

QuicKey Pro™ ELISA

- 90 min operation time
- Easy to store

Mini Sample ELISA

- 25 µL loading volume

2023

- Cytokine High Sensitivity ELISA kit can detect target at fg-level.
- Uncoated ELISA kit and ELISA Antibody Pair have become a cost-effective alternative in cell secreted protein detection by flexibly adjusting the antibody ratio and matching various auxiliary reagents.

High-Sensitivity ELISA

- Sensitivity increased by 2-100 times
- Sample detection rate 30%-100%

Uncoated ELISA

- Core raw materials
- Matching ancillary reagent kit

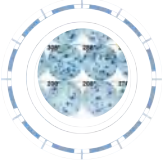

ELISA Antibody Pair

- Antibodies to raw materials

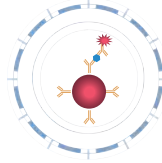

2024

- Continued focus on cytokine detection. Breaking through the traditional ELISA method, by combining cell culture and flow cytometry, cytokine detection can be carried out in a more sensitive, economical and efficient way.

ELISpot

- High sensitivity

EcoPlex™ Kits

- Multi-target joint detection
- Small sample volume

Target Selection is Guided by Customer Needs

Our ELISA kits are widely used in more than 10 hot research areas, such as Cancer & Tumor, Immunology, Cardiovascular, Stem Cell, Neuroscience, Metabolism, Microbiology, Cell Biology, Signaling Transduction, Epigenetics and Nuclear Signaling and so on.

System Optimization is Guided by Customer Needs

Stability

We continue to optimize the reagent component system to improve the stability of the kit under different preservation conditions:

- For the kits stored at 2-8°C/-20°C (12 months), the overall storage time at 2-8°C was increased from 1 week to 3 months.
- The new series ELISA kit is prioritized to be developed with overall 2-8°C (6 months) storage system.

Safety

Apart from BSA as a protective protein, the kit does not contain any other ingredients of animal origin, which meets the requirements of the Cartagena Biosafety Protocol.

In addition, the preservative of the kit is proclin 300, which is less toxic, making it safe and environmentally friendly.

Authoritative Recognition

- CiteAb recognized Elabscience® as the "ELISA KIT SUPPLIER TO WATCH IN 2019".
- Elabscience® ELISA products have been cited in over 10,000 SCI papers, featured in top-tier journals like *Nature Medicine*, *Nature*, *Cell*, *Immunity*, *Signal Transduction and Targeted Therapy*, etc.

Efficient Service

- Ready-to-use products with guaranteed stock, shipped within 2 to 3 business days.
- Professional technical support responds within 8 h and provides solutions within 24 h.
- The market service is thoughtful and fast, and more technical resources are shared to escort the entire experiment.

Elabscience® Hot Selling ELISA Kits

Cat. No.	Product Name	Detection Range	Sensitivity
E-EL-0033	ST/5-HT(Serotonin/5-Hydroxytryptamine) ELISA Kit	15.63-1000 ng/mL	9.38 ng/mL
E-EL-0162	TGF-β1(Transforming Growth Factor Beta 1) ELISA Kit	0.16-10 ng/mL	0.10 ng/mL
E-EL-H6156	Human IL-6(Interleukin 6) ELISA Kit	1.56-100 pg/mL	0.94 pg/mL
E-EL-H0109	Human TNF-α(Tumor Necrosis Factor Alpha) ELISA Kit	7.81-500 pg/mL	4.69 pg/mL
E-EL-M0037	Mouse IL-1β(Interleukin 1 Beta) ELISA Kit	7.81-500 pg/mL	4.69 pg/mL
E-EL-M0044	Mouse IL-6(Interleukin 6) ELISA Kit	31.25-2000 pg/mL	18.75 pg/mL
E-EL-M3063	Mouse TNF-α(Tumor Necrosis Factor Alpha) ELISA Kit	7.81-500 pg/mL	4.69 pg/mL
E-EL-R0012	Rat IL-1β(Interleukin 1 Beta) ELISA Kit	31.25-2000 pg/mL	18.75 pg/mL
E-EL-R0015	Rat IL-6(Interleukin 6) ELISA Kit	12.50-800 pg/mL	7.50 pg/mL
E-EL-R2856	Rat TNF-α(Tumor Necrosis Factor Alpha) ELISA Kit	15.63-1000 pg/mL	9.38 pg/mL

VII Antibodies & Proteins

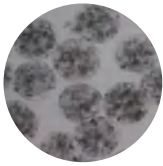

Strictly Validated High-quality Proteins & Antibodies

Elabscience® provides high-quality recombinant proteins, strictly validated monoclonal and polyclonal antibodies, and antibody-related products, covering immunoprecipitation and protein purification (agarose/magnetic beads), antibodies (primary antibodies for scientific research, antibody pairs, unlabeled flow antibodies, tag/loading control antibodies, secondary antibodies, and other special types of antibodies, etc.), and proteins. All products have a wide range of applications and are recognized by leading domestic laboratories and research institutions.

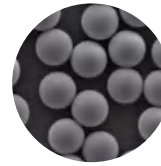

Based on the company's powerful protein and antibody R&D platforms, Elabscience® will continue to launch a series of innovative, high-quality scientific research and clinical diagnostic antibody products for the majority of scientific research customers and institutions.

- High-quality Antibody Development Platform
- Active Protein Preparation Platform
- Development of Multiple Reagent Raw Materials

Immunoprecipitation & Protein Purification

Agarose

Magnetic Beads

Tag Protein Purification Kits

Immunoprecipitation Kits

Tag Antibodies Agarose/Magnetic Beads

Other Agarose/Magnetic Beads Products

**High Specificity**

Highly specific binding to target proteins, with few false-positives and false-negatives.

**Efficient and Convenient**

Efficient binding capacity, low nonspecific adsorption, simple and convenient operation, and an IP process as short as 40 minutes.

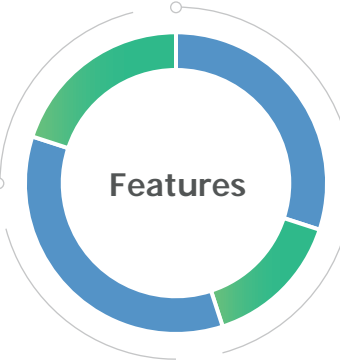

**A Wide Range of Applications**

Applications covering IP, Co-IP, pull-down, and protein purification are suitable for a variety of experimental solutions.

**Flexibility and Cost-effectiveness**

Products are on demand reinforcement, flexible selection, and more cost-effective.

Features

© Protein Purification Validation

© IP Validation

Antibodies

- Antibody Pairs
- Unlabeled Flow Antibodies
- Tag Antibodies
- Loading Control Antibodies
- Secondary Antibodies
- Other Antibodies

Features

01 Diversified product types

- Full-length antibodies: mAb/pAb/rAb etc.
- Antibody fragments: scFv/Fab/VHH etc.
- Antibody pairs/ Unlabeled Flow Cytometry antibodies/ Tag antibodies/ Loading control antibodies/ Secondary antibodies/ Modified antibodies, etc.

03 Rigorous quality control

- Standardized acceptance process.
- Multiple validation methods (ELISA/WB/IHC/IF, etc.).
- Validation by natural protein samples.

05 Comprehensive sales services

- Long-term supply of self-developed and produced core raw materials.
- Complete, genuine, and valid product information.
- Professional technical support and guidance.

02 Wide range of applications

- Multiple species reactivity.
- Diversified applications of WB/IHC/IF/ELISA/IP/ FCM etc.
- Raw materials development of POCT/ Pathologic Diagnosis/ FCM/ Cytometric Bead Array.

04 Excellent quality

- Selected and designed high-quality immunogens.
- Industry-leading validation methods.

© Antibody Pairs (standard curve) Validation

© Antibody Sensitivity (FCM) Validation

© Antibody Stability Validation

© WB Validation

© IF Validation

© IHC Validation

Elabscience® antibodies are strictly tested using a variety of detection methods to ensure their quality and to guarantee the accuracy of the results.

Proteins

Prokaryotic Recombinant Protein

Eukaryotic Recombinant Protein

Elabscience® executes strict quality standards and provides high purity, high consistency, and high activity recombinant proteins to support your scientific research on protein structure and function, cell culture and function testing, antibodies and immunoassay reagent development, biological drug target discovery, etc.

Recombinant Protein Advantages

01 Comprehensive expression system

- Prokaryotic: *E. coli*
- Eukaryotic: HEK293/CHO, yeast, insect cell - baculovirus.

02 High quality proteins

- High purity and endotoxin < 1 EU/μg.
- No component of animal origin.

03 Rigorous quality control

- Professional quality control team.
- Multiple testing indicators and continuous quality tracking and monitoring.
- Stable mass production.

04 Excellent pre-sales and post-sales service

Professional technical support team contributes to solve problems.

◎ Protein Purity Validation

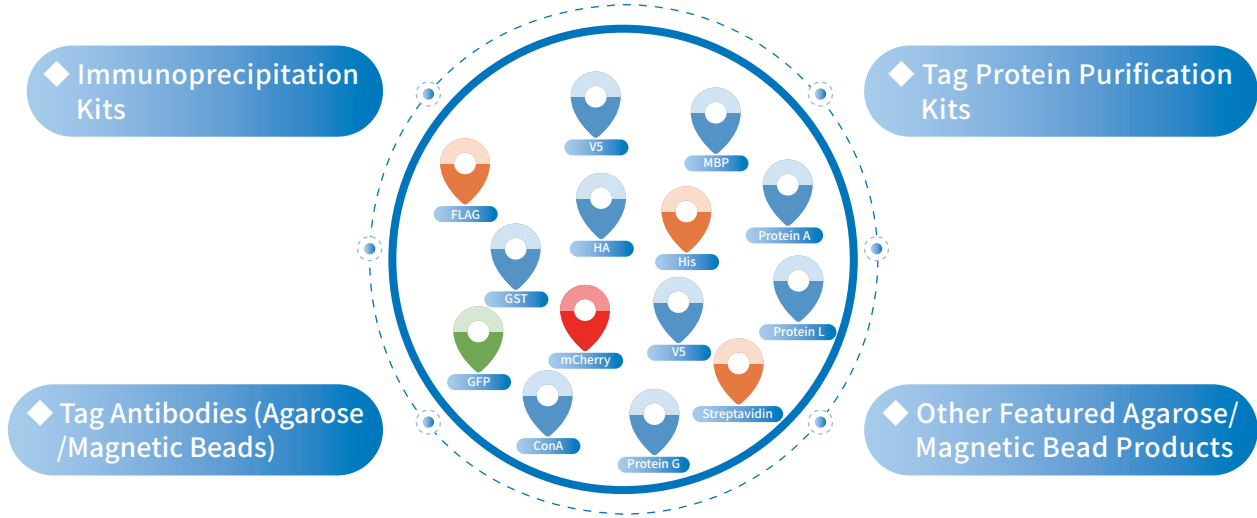

◎ Protein Activity Assay

Antibody & Protein Products Introduction

Immunoprecipitation & Protein Purification (Agarose/Magnetic Beads)

High specificity • Less interference • Strong affinity • Full process services of IP/Co-IP

Antibodies

ELISA Antibody Pairs

- Various kinds of markers for human, mouse, and rat.
- Flexible pair set of capture and detection antibodies.

ELISA (Cap)	ELISA (Det), ELISA (Cap)	ELISA (Det)
Human PCSK9	Human FE	Human PCSK9
Human IL-22	Human NGAL	Human IL-22
Human NMP22	Mouse ENG	Human NMP22
Human IGFBP-5	Rat IL-12	Human IGFBP-5
Human HB	RatVCAM-1/CD106	Human HB

Unlabeled Flow Antibodies

- Focus on CD antigen series to assist cell immunology research and create high-quality raw materials for Flow Cytometry.

CD146	CD95	CD54
CD1a	CD45	CD105
CD22	CD147	CD16/32

Protein & Antibody Related Reagents

Elabscience® provides a complete range of WB, IF, and IHC kits and experimental detection technology solutions, contributing to saving time and maintaining reliability and efficiency in scientific research.

Tag and Loading Control Antibodies/Other Scientific Antibodies

- Multiple advanced applications (WB/IF/IHC/IP/FCM)
  - Excellent sensitivity
- High specificity
  - Strict reliability testing

Tag Antibodies

- His-Tag Polyclonal Antibody
- GST-Tag Monoclonal Antibody
- GFP Monoclonal Antibody
- HA-Tag Monoclonal Antibody

Loading Control Antibodies

- PCNA Polyclonal Antibody
- GAPDH Polyclonal Antibody
- beta actin Polyclonal Antibody
- beta Tubulin Polyclonal Antibody

Other Scientific Antibodies

- CDH1 Polyclonal Antibody
- TNNI3/cTn-I Polyclonal Antibody

Proteins

One-stop service from gene synthesis, vector construction to protein expression and purification

Prokaryotic recombinant protein (*E.coli*)

- Recombinant Human BIM/BCL2L11 Protein (His Tag) (PDEH100013)
- Recombinant Human PTEN Protein (His Tag) (PDEH100023)
- Recombinant Human PUMA/BBC3 protein (His Tag) (PDEH100035)

Eukaryotic recombinant protein (HEK293)

- Recombinant Human Interferon  $\gamma$ /IFNG Protein (PDMH100010)
- Recombinant Human Myeloperoxidase/MPO Protein (His Tag) (PDMH100014)
- Recombinant Human Coagulation Factor XIII B chain/F13B protein (His tag) (PDMH100072)

Immuno-Related Reagents

Easy to Use

Excellent Sensitivity

High Specificity

Good Reliability

A complete range of related kits and experimental detection technology solutions contribute to saving time and scientific research.

2-step plus Poly-HRP Anti Rabbit/Mouse IgG Detection System(E-IR-R211)

Western Blot Detection Kit(E-IR-R304A)

High Accuracy and Absorbability Western Blot Detection Kit(E-IR-R304B)

Immunol Fluorescence Staining Kit (Anti-Rabbit IgG-Cyanine3) (E-IR-R321)

Immunol Fluorescence Staining Kit (Anti-Mouse IgG-Cyanine3) (E-IR-R322)

VIII Part of High IF Publications
