

Life Science Products

For Research Use

Explore our comprehensive range of research-use life science products, including ELISA kits, metabolism and cellular assay kits, and high-quality antibodies. Manufactured with precision and reliability, these products are designed for advancing research in various fields, from preliminary experimentation to specialized applications.

ELISA Kits

- **Easy to use**
 - Clear and simple instructions
 - Compatible with many different sample types
- **Wide variety of targets**
 - Perfect for many different research areas
- **High stability**
- **Extended shelf life**
- **Instant ELISAs**
 - Get results in as little as 1.5 hours!
- **Food Safety ELISAs**
 - For mycotoxins, residues and other common contaminants
- **Veterinary targets**
 - Kits available for a range of hard to find species
- **Product quality guarantee**
 - Perform your experiments with confidence

Assay Kits

- **Functional Assays**
 - For the detection and quantification of many common analytes
- **Enzyme Activity Assays**
- **Metabolism Assay Kits**
- **Easy to use**
- **Colorimetric Detection**
- **Wide variety of targets**
- **For use with many common sample types**
- **Apoptosis Detection Kits**
 - Fluorometric detection
 - Available with many common fluorophores
- **Cell Cycle Kits**
- **Cell Counting Kits**
- **Protein Quantification Kits**
 - Bicinchoninic Acid or Bradford Protein Assay kits

Antibodies

- **Primary Antibodies**
 - Monoclonal and Polyclonal antibodies available
 - High specificity and sensitivity
 - Wide variety of targets and reactivities
 - Validated for many different applications
- **Secondary Antibodies**
 - Conjugated and unconjugated products available
- **Flow Cytometry Antibodies**
 - Wide range of fluorophore dyes
 - Intracellular or extracellular targets available
- **Highly validated**
- **For use with a variety of different applications**
 - IF, IHC, IP, WB, ELISA, Flow cytometry, and more
