

Fast Mouse Genotyping System

Fast Mouse Genotyping System is designed for rapid extraction and PCR amplification of genomic DNA from mouse tail/toe/ear punch and other tissues. It contains all reagents required for DNA extraction and PCR amplification. PCR products can be directly loaded onto agarose gels to visualize amplified target. **We also offer customized genotyping service.**

Main Features:

- ▶ **Simple:** PCR products can directly load into electrophoresis gel
- ▶ **Fast:** DNA extraction takes only 10 min
- ▶ **Flexible:** Compatible with real time PCR and regular PCR
- ▶ **Multiplexing:** Strip tube for parallel processing
